A Better Kind of Violence Filip Palda, 2016-11-25 Finally the much awaited third book in Palda s Social Calculus Trilogy which covers all branches of economics In A Better Kind of Violence Palda reveals how in recent years economists have learned to fuse economics and politics to produce a total theory of power The most surprising conclusions are that politics tends towards a limited form of efficiency and that the advice of policy experts is irrelevant The book draws on the three pillars of economics individual maximization of utility material constraints the emergence of equilibrium to show how economists have bypassed all other social sciences in creating the greatest breakthrough in political thinking since Plato

Industrial Concentration and the Chicago School of Antitrust Analysis Jan B. Rittaler, 1989 After roughly 15 years of merger control application in the Federal Republic of Germany a

reassessment of the significance of this instrument of antitrust policy seems necessary This is particularly so in view of the reorientation of merger control policy in the United States which has been in its original version the model for the German merger control system Concerning merger control the reorientation is characterized by the notion that the structure conduct performance paradigm which has dominated U S antitrust for a quarter of a century is imprecise or even incorrect and that bigness in business does not necessarily mean badness This makes the fundamental question arise of whether the German merger control system is still up to date in terms of the underlying market theory and of whether the German Act Against Restraints of Competition needs a reorientation towards aspects of market conduct and performance instead of market structure by means of a Fifth Amendment
