whole town Pennsylvania Folklife, 1971 The Last Communist Virgin Ping Wang, 2007 Wang Ping's The Last Communist Virgin is a beauty of a collection. She has interwoven the earthiness of China and the harshness of immigrant life to create a series of short stories that are at once pitiful, heartbreaking, funny, and deeply inspiring. Lisa See, author of Snow Flower and the Secret Fan, from the restaurants of New York's Chinatown to the retail emporium of Bergdorf Goodman and from remote Chinese military outposts to the streets of Beijing, the tremors of China's rapid economic and cultural growth can be felt. As the characters in these stories struggle to find their way, a young girl discovers love amidst a sea of angry Red Guards, migrants navigate New York's relentless rat race, an ambitious businesswoman finds the meaning of success in her rival, and an old man returns to a Beijing he doesn't recognize on a mission to restore his son-in-law's flagging honor. Moving smoothly across political, cultural, and personal borders and between countries, continents, and languages, these stories open a window into the rapid transformations of an ancient culture and the soul's thirst for adventure and harmony in a quickly changing world. Wang Ping was born in Shanghai and grew up on a small island in the East China Sea. After three years spent farming in a mountain village commune, she attended Beijing University. In 1985, she left China to study in the United States, earning her PhD from New York University. She is the acclaimed author of the short story collection American Visa, the novel Foreign Devil, two poetry collections Of Flesh, Spirit, and The Magic Whip, and the cultural study Aching for Beauty: Footbinding in China. She now lives in St. Paul, Minnesota, and teaches at Macalester College. web notice that the mole fraction has no units on it and is written as a decimal value do not change it to percent note of caution you could see the term mole percent it is simply the mole fraction multiplied by 100 for example in the problem just below the mole fraction of cinnamic acid is 0 2885 its mole percent would be 28 85
