**The High Frontier** Gerard K. O'Neill, 1989      *The High Frontier* Gerard K. O'Neill, 2000      Provisional Cities Renata Tysczuk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities      *Space, the High Frontier in Perspective* Daniel Deudney, 1982 This paper examines how the exploration of space has affected life on earth Examined are milestones in space war or peace in space learning about earth from space the satellite communications revolution space industrialization and the ownership of space The real beginning of the Space Age was the October 1957 Soviet launch of a 184 pound satellite into orbit The United States put an object into orbit in January 1958 The Soviet Union has taken an important lead in internationalizing access to space by sending Cuban East European French and Mongolian cosmonauts into space The current projects of the U S and Soviet programs the space shuttle and the space station are perfect complements The superpowers have begun a race for the first time to place weapons of destruction in orbit Space militarization is being aggressively promoted by both countries The most valuable contribution space activities have made is the information they have provided about the universe and about the earth For example scientists are learning how the atmosphere oceans sunlight and life forms interact to make the planet habitable and how human actions are altering those systems The biggest scientific advances have been in astronomy and related sciences As a result of the satellite communications revolution satellite TV broadcasts are bringing cultural interactions that for the first time begin to match the scale of the world s economical and political interdependencies Disputes regarding the ownership of space are beginning to emerge RM      *Space Exploration and Humanity* American Astronautical Society, 2010-08-23 A complete history of human endeavors in space this book also moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications In two expertly written volumes *Space Exploration* and

Humanity A Historical Encyclopedia covers all aspects of space flight in all participating nations ranging from the Cold War era beginnings of the space race to the lunar landings and the Apollo Soyuz mission from the Shuttle disasters and the Hubble telescope to Galileo the Mars Rover and the International Space Station The book moves beyond the traditional topics of human spaceflight space technology and space science to include political social cultural and economic issues and also commercial civilian and military applications Produced in conjunction with the History Committee of the American Astronautical Society this work divides its coverage into six sections each beginning with an overview essay followed by an alphabetically organized series of entries on topics such as astrophysics and planetary science civilian and commercial space applications human spaceflight and microgravity science space and society and space technology and engineering Whether investigating a specific issue or event or tracing an overarching historic trend students and general readers will find this an invaluable resource for launching their study of one of humanity s most extraordinary endeavors **SPACE & AMERN**

**IMAGINATION** Howard E. McCurdy,1997-10-17 Examining popular images that have helped motivate the most ambitious civil space program in the world McCurdy argues that the spacefaring dream tapped into several of America s most deeply rooted cultural ideals He also explains how space advocates playing on the public s Cold War fears convinced politicians that control of space meant control of the earth He also contends that the gaps between expectations and reality led to public policy obligated to entertain as well as inform 43 photos *The Inner Limits of Outer Space* John C. Baird,1987

Designing & Building Space Colonies Martin K. Ettington,2022-07-22 Designing Building Space Colonies A Blueprint for the Future One of the greatest adventures in the future of humanity will be to construct work and live in space based structures In this book we look at the history of ideas for living in space proposed space colony designs and technology The details of current life support technology on the International Space Station is reviewed and what technologies will be required for development of large scale space colonies What other things in terms of financing and materials availability will be needed also Finally we conclude with some recommendations to get us ready to build these colonies *Counterculture Green* Andrew G. Kirk,2007 For many it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America now known as living off the grid In recovering the history of the Catalog s unique brand of environmentalism historian Kirk recounts how Stewart Brand and the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living Kirk shows us that Whole Earth was more than a mere counterculture fad At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement it became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way From publisher description **Incoming Asteroid!** Duncan Lunan,2013-10-17 Incoming Asteroid is based

on a project within ASTRA the Association in Scotland to Research into Astronautics to provide scientific answers to the question what would we do if we knew there was going to be an asteroid impact in ten years time or less Clearly there are many things humanity can do nothing about for example an unseen object traveling towards us so fast that we have no time to prepare or an object so large it may be unstoppable A realistic hazard model was decided upon and the scenario developed from that an incoming object about 1 kilometer in diameter in an orbit ranging from the outer rim of the Asteroid Belt to within that of Earth's Three basic possibilities are considered in this book The first is the deflection of the asteroid using remote probes along with a number of possible technologies to change the asteroid's course Second is the attempt of a manned mission in order to plant a propulsion system on the asteroid to push it into a different orbit Third is the nuclear option a last ditch attempt to break up and then disperse the asteroid using nuclear weapons A rather impractical combination of these second and third options were used as the plot of the popular 1998 Bruce Willis feature film Armageddon Although the cost of developing the technology needed to protect the Earth would be substantial there would certainly be spin off benefits These could eventually result in practical small scale atomic energy sources new propulsion systems that could make extraterrestrial mining within the solar system a possibility and other as yet unforeseen benefits And finally Incoming Asteroid considers the political implications how governments across the world should best react to the threat with a view to minimizing loss of life and in the weeks running up to the possible impact preventing panic in the population

*Decision* Howard E. McCurdy, 1990-08 Selected by Choice Magazine as an Outstanding Academic Title Outstanding Academic Title 1991 Choice Magazine Although building a space station has been an extraordinary challenge for America's scientists and engineers the securing and sustaining of presidential approval congressional support and long term funding for the project was an enormous task for bureaucrats The Space Station Decision examines the history of this controversial initiative and illustrates how bureaucracy shapes public policy Using primary documents and interviews Howard E. McCurdy describes the events that led up to the 1984 decision to build a permanently occupied international space station in low Earth orbit As he follows the trail of the space station proposal through the labyrinth of White House policy review McCurdy explains the evolution of the presidential budget review process the breakup of the cabinet system the proliferation of subcabinets and Executive Office interagency the involvement of White House staff in framing issues for presidential review and the role of bureaucracy in advancing administration legislation on Capitol Hill Comparing the space station decision to earlier decisions to go to the moon and to build the space shuttle McCurdy shows how public officials responsible for long term science and technology policy maneuvered in a political system that demanded short term flexibility      **Urban Environments** Elisabetta G. Mapelli, 2001 An anthology of articles from recent issues of Architectural Design this text focuses on living in the 21st century and takes from Des res architecture The everyday in architecture and Ephemeral portable architecture and with a small selection from Sci fi architecture      **The Next Three Futures** W. Warren Wagar, 1991-08-26 Wagar pulls together all aspects of futures studies in this unique volume comprising a vital introduction to and defense of the impressive array of futurist inquiry The book examines how futurists think and work It compares and analyzes their ideas on a wide range of topics including the environment politics economics war and peace and sociocultural issues Wagar also shows how the three ideological paradigms within the futures field the technoliberal the radical and the countercultural play a role in the study of the future The organizing theme of this unique work by W. Warren Wagar is the way in which images of alternative futures are shaped by ideological differences in the present Wagar identifies three principal camps of futurist thought technoliberals radicals and counterculturalists By far the largest group are the technoliberals supporters of parliamentary democracy civil liberties free enterprise and technological progress Radicals occupy the Marxist and democratic socialist Left while counterculturalists espouse decentralist eco pacifist and New Age values The Next Three Futures pulls together all aspects of futures studies comprising a vital introduction and outline of the many worlds of futurist inquiry The book consists of two parts the first an examination of how futurists think and work the second a comparative and critical analysis of their ideas on a wide variety of topics After a short prologue the first chapter defines the scope and limitations of futures research and discusses its chief methodologies The next chapter gives a valuable intellectual history of futurism from its earliest origins with special emphasis on the work of H. G. Wells The idea of the ideological paradigm in futures studies is described in the third chapter The following four chapters making up part two investigate the thinking of contemporary futurists on the

environment economic and political developments war and peace and societal cultural issues Wagar's epilogue considers the possibility that the technoliberal radical and countercultural futures may all lie ahead for humankind but at different stages and times in the years to come This highly readable volume will be of great value to students of futurism futurists political scientists sociologists economic forecasters environmentalists and anyone else fascinated by the study of the future
