modern values of traditional Chinese culture. This book embodies the innovative interpretation of Chinese traditional culture in the Chinese academic community. The author discusses the philosophical and cultural resources that can be used for reference in Chinese and Western cultural tradition focusing on traditional Chinese Confucianism, Taoism, Buddhism and painting art. Western modern ecological philosophy, Heidegger's ontology, ecological aesthetics, and British and American environmental aesthetics. In short, the book comprehensively discusses the author's concept of ecological ontology aesthetics as an integration and unification of ontology aesthetics and ecological aesthetics. This generalized ecological aesthetics explores the relationship between humans and nature, society, and itself, guided by the brand new ecological worldview in the post-modern context. It also changes the non-beauty state of human existence and establishes an aesthetic existence state that conforms to ecological laws. The Routledge Companion to Aesthetics Berys Nigel, Dominic Lopes, 2005.

Containing fifty-four chapters written by leading international scholars and covering all aspects of aesthetics, this fully revised second edition includes eight new entries and updated further reading. **Ecoaesthetics and Ecosophy in China** Cheng Xiangzhan, 2023-10-09. Chinese ecoaesthetics, which originated in 1994, has developed theoretically over the last 30 years. This branch of aesthetics, which is based on ecology and transforms aesthetically towards the era of ecological civilization, uses ecological realism as its philosophical foundation and ecohumanism as its guiding principles. Its central aesthetic paradigm is known as the body-mind-environment model. Its main research object is ecological aesthetic appreciation, an exploration of how to appreciate aesthetics and ecology through ecological beauty. Additionally, ecohumanism can be further improved by referring to principles of ecology and examining the aesthetic synergies between humans and the earth's ecosystem. Ultimately, ecohumanism is not only a method to aid in survival in an ecological crisis but to elevate the human condition through assuming ecological responsibilities and promoting ecological civilization, leading to a more valuable and meaningful life. The theme of this book, Ecosophy C, can be summarized as Moving toward the Aesthetics of Eternal Engendering. Its key phrase, Creating life, corresponds to shengsheng in Chinese, literally implying a continuous cycle of reproduction. Philosophically, this concept translates to eternal engendering. In essence, ecoaesthetics is the pursuit of the endless cycling of bio-engendering, which is the main goal of ecoaesthetics. Cheng Xiangzhan is outstanding among Chinese environmental aestheticians in joining classical and contemporary Western environmental aesthetics with his original contributions to the more recent work by Chinese scholars. Cheng's creative and integrative accomplishments are supported by a remarkable facility in English and reflected in his original and systematic consideration of the outstanding issues. While much can be debated, there is substantial material here, and this book makes a significant contribution to carrying the discussion forward. Arnold Berleant, a distinguished environmental aesthetician, His latest book, *The Social Aesthetics of Human Environments*, will appear in September 2023. Mountain Aesthetics in Early Modern

Latin Literature William M. Barton,2016-10-26 In the late Renaissance and early modern period man s relationship to nature changed dramatically An important part of this change occurred in the way that beauty was perceived in the natural world and in the particular features which became privileged objects of aesthetic gratification This study explores the shift in aesthetic attitude towards the mountain that took place between 1450 and 1750 Based on previously unknown and unstudied material this volume now contends that it took place earlier in the Latin literature of the late Renaissance and early modern period

Nature and Landscape Allen Carlson,2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes Nature and Landscape is an important introduction to this rapidly growing area of aesthetic understanding and appreciation Allen Carlson begins by tracing the development of the field s historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment

Chinese Environmental Aesthetics Gerald Cipriani,2015-05-15 China is currently afflicted by enormous environmental problems This book drawing on ancient and modern Chinese environmental thinking considers what it is that makes an environment a desirable place for living The book emphasises ideas of beauty and discusses how these ideas can be applied in natural agricultural and urban environments in order to produce desirable environments The book argues that environment is both a product of nature and of human beings and as such is potentially alterable by culture The book

explores the three aspects of environmental beauty whereby such alteration might be beneficially made integrated and holistic ecological and man made and authentic and everyday This book addresses environmental issues by distinctively suggesting that an aesthetic approach inspired from ancient Chinese tradition could help us overcome the many problems that human beings have created at local and global levels Although its main focus is the traditional and current contexts of the People s Republic of China the book transcends national borders A typical example is the ancient Chinese thought system and cultural practice of Feng Shui that sought to negotiate how the natural environment and human constructions can cohabit without destructing each other The author evokes that sought after harmony through the powerful image of gardens of life whose environmental beauty can be found in traditional Chinese gardens and palaces as well as historically and culturally preserved cities
