Larson, 2012-12-06 The cambium has been variously defined as follows The actively dividing layer of cells that lies between and gives rise to secondary xylem and phloem vascular cambium IAWA 1964 A meristem with products of periclinal divisions commonly contributed in two directions and arranged in radial files Term preferably applied only to the two lateral meristems the vascular cambium and cork cambium or phellogen Esau 1977 and Lateral meristem in vascular plants which produces secondary xylem secondary phloem and parenchyma usually in radial rows it consists of one layer of initials and their undifferentiated derivatives Little and Jones 1980 Clearly the cambium is a diverse and extensive meristem and no one definition will encompass all manifestations of what anatomists consider cambium Its diversity and extent are further exemplified by a single plant such as a temperate zone tree in which procambium is initiated in the embryo and perpetuated throughout every lateral primary meristem before giving rise to cambium in the secondary body The cambium thereafter performs its meristematic task of producing daughter cells that differentiate to specialized tissue systems The cambium however does not remain static Its derivatives vary either in form or function or rate of production at different positions on the tree with age of the tree and with season of the year Moreover the cambium responds both to internal signals and to external stimuli such as environment or wounding

Luckman, 2010-07-15 Dendrogeomorphology Beginnings and Futures A Personal Reminiscence My early forays into dendrogeomorphology occurred long before I even knew what that word meant I was working as a young geoscientist in the 1960s and early 1970s on a problem with slope movements and deformed vegetation At the same time unknown to me Jouko Alestalo in Finland was doing something similar Both of us had seen that trees which produced annual growth rings were reacting to geomorphic processes resulting in changes in their internal and external growth patterns Dendroclimatology was an already well established field but the reactions of trees to other environmental processes were far less well understood in the 1960s It was Alestalo 1971 who first used the term dendrogeomorphology In the early 1970s I could see that active slope movement processes were affecting the growth of trees in diverse ways at certain localities I wanted to learn more about those processes and try to extract a long term chronology of movement from the highly diverse ring patterns
