## **The Case Of The Scientific Murderer:**

**Expert Evidence and Scientific Proof in Criminal Trials** Paul Roberts,2017-07-05 Forensic science evidence and expert witness testimony play an increasingly prominent role in modern criminal proceedings Science produces powerful evidence of criminal offending but has also courted controversy and sometimes contributed towards miscarriages of justice The twenty six articles and essays reproduced in this volume explore the theoretical foundations of modern scientific proof and critically consider the practical issues to which expert evidence gives rise in contemporary criminal trials The essays are prefaced by a substantial new introduction which provides an overview and incisive commentary contextualising the key debates The volume begins by placing forensic science in interdisciplinary focus with contributions from historical sociological Science and Technology Studies STS philosophical and jurisprudential perspectives This is followed by closer examination of the role of forensic science and other expert evidence in criminal proceedings exposing enduring tensions and addressing recent controversies in the relationship between science and criminal law A third set of contributions considers the practical challenges of interpreting and communicating forensic science evidence This perennial battle continues to be fought at the intersection between the logic of scientific inference and the psychology of the fact finder s common sense reasoning Finally the volume s fourth group of essays evaluates the limited success of existing procedural reforms aimed at improving the reception of expert testimony in criminal adjudication and considers future prospects for institutional renewal with a keen eye to comparative law models and experiences success stories and cautionary tales

People searches and working with databases Overlooked DNA in PKU cards The plight of the missing and unknown Applying historical and geographical context Online and off line newspaper research Public and published records The use of volunteers Contact with co victims Cold case review teams and information sharing resources Taking advantage of the media Using a thinking outside the box approach this volume helps fill major gaps in traditional cold case investigation training and techniques enabling investigators to confidently reopen and crack the mystery of cases long thought unsolvable Silvia Pettem was quoted in a January 29 2012 article on missing persons in the Colorado Springs Gazette *The Saturday Review of Politics, Literature, Science and Art*, 1856
