Austin,2011-09-20 During the early twentieth century in China a number of key economic leaders converted to Christianity Whilst strongly influenced by cultural heritage powerful modernizing forces and tumultuous political changes the new Christian identity inculcated by Protestant missionaries motivated these entrepreneurs to modify their business practices improve their social environment and extend the influence of Christianity Protestant and Catholic sojourners likewise made significant contributions into their adopted communities With unprecedented economic growth in China today a fascinating contemporary parallel can be seen particularly through the influence of Pentecostal charismatic and evangelical training Previous research has explored the emergence of the urban Christian lite in modern China However this systematic study provides new understanding of how Christian identity motivates Chinese business Christians toward economic social and religious contribution

Society, Culture, and the State in Germany, 1870-1930 Geoff Eley,2025-12-10 Society Culture and the State in Germany 1870 1930 draws together important new work on the Kaiserreich the period between Bismarck s unification of Germany and the First World War Work on the Kaiserreich built up impressive momentum during the 1970s and 1980s when a series of inspiring but divisive controversies called into question the ways in which German historical development in the nineteenth and twentieth centuries was mainly understood These discussions focused on issues of continuity between Bismarck and Hitler and the peculiar strength of authoritarianism in German political culture raising important questions about the deep origins of Nazism and about Germany s alleged differences from the West The collection purposefully brings certain issues and approaches into the foreground These include the value of taking gender seriously as a priority of historical work the emergence of social policy and welfare during the early twentieth century religious belief and affiliation as a neglected dimension in modern German history the tremendous importance of the First World War as a climacteric and the exciting potentials of cultural studies and the new cultural history A varied group the contributors embrace different kinds of history and certainly do not subscribe to a common line Some essays suggest alternative periodizations and focus on the early twentieth century decades rather than the integral unity of the Kaiserreich as such Together they take stock of the field critically synthesizing existing knowledge and laying down agendas for the future
