## **The Guide Ourselves Our Planet Our Universe:**

*The Guide Book* Tony Neate, Michael Dean, 1986      **Radical Visions** Glenn Man, 1994-10-30 *Radical Visions* discusses an important period in American film history. Films such as *Bonnie and Clyde*, *The Graduate*, *McCabe and Mrs. Miller*, *Midnight Cowboy*, *Nashville*, and *Taxi Driver* challenged the narrative structure and style of the classical Hollywood paradigm, transformed its conventional genres, exploded traditional American myths, and foregrounded a consciousness of the cinematic process. Film students, scholars, and aficionados will gain insight into generic conventions and narrative style presented within the cultural attitudes of the time. The book features a chronological movement through the period, not by auteur but by film, from *Bonnie and Clyde* to *Taxi Driver*. It includes in-depth analyses of 16 films but discusses other films when relevant. It traces the thematic development of the films as the period progresses from an optimistic radicalism at the beginning to doubt and shattered dreams to paranoia and pessimism at the end. It summarizes contemporary reviews and reactions to the films as they came out and gauges the films' interactions with audiences and the society of the time. It also discusses European filmmakers' influences on the films of the period. The book supports and solidifies the view of a Hollywood renaissance during this period and it more sharply defines and delineates the parameters and characteristics of the period than previous studies.

**Our Sunday book of reading and pictures, ed. by T. Archer** *Our Sunday book*, 1889      *The Dawn of a Mindful Universe* Marcelo Gleiser, 2023-08-22 An award-winning astronomer and physicist's spellbinding and urgent call for a new Enlightenment and the recognition of the preciousness of life using reason and curiosity: the foundations of science to study, nurture, and ultimately preserve humanity as we face the existential crisis of climate change. Since Copernicus, humanity has increasingly seen itself as adrift, an insignificant speck within a large, cold universe. Brazilian physicist, astronomer, and winner of the 2019 Templeton Prize, Marcelo Gleiser argues that it is because we have lost the spark of the Enlightenment that has guided human development over the past several centuries. While some scientific efforts have been made to overcome this increasingly bleak perspective—the ongoing search for life on other planets, the recent idea of the multiverse—they have not been enough to overcome the core problem: we've lost our moral mission and compassionate focus in our scientific endeavors. Gleiser argues that we're using the wrong paradigm to relate to the universe and our position in it. In this deeply researched and beautifully rendered book, he calls for us to embrace a new life-centric perspective, one which recognizes just how rare and precious life is and why it should be our mission to preserve and nurture it. *The Dawn of a Mindful Universe* addresses the current environmental and scientific impasses and how the scientific community can find solutions to them. Gleiser's paradigm rethinks the ideals of the Enlightenment and proposes a new direction for humanity, one driven by human reason and curiosity whose purpose is to save civilization itself. Within this model, we can once again see ourselves as the center of the universe, the place where life becomes conscious and regain a clear moral compass which can be used to guide both science and the politics around it.      **Resurgence**, 1994      *Astronomical Mindfulness* Christopher G. de Pree, Sarah
