These are critiqued in terms of pragmatist views on meaning which are rarely taken up in this area. It is argued that to understand the grounding of social structures and power relations in discourse we must begin with a systematic account of how meaning is contextually fixed. It is proposed that a pragmatist reading of Foucault's arguments about governmentality offers a productive framework for discourse analysis. To illustrate the advantages of this framework the book presents a case study of the British government's adoption of resilience, sustainability and wellbeing discourses in the period 2000-2020. A dataset of 179 million tokens sampled from approximately 170,000 government documents is used to illustrate how this framework can be combined with natural language processing (NLP) to make robust inferences. This study will be of interest to both sociologists interested in language and in the methodological potential of recent developments in NLP. Importantly, the book demonstrates how LLMs can be harnessed to bring new perspectives to long-standing sociological questions.

Language Curriculum Design John Macalister, I.S.P. Nation, 2009-09-10. Crystal clear and comprehensive yet concise, this text describes the steps involved in the curriculum design process, elaborates and justifies these steps, and provides opportunities for practicing and applying them. The description of the steps is done at a general level so that they can be applied in a wide range of particular circumstances. The process comes to life through plentiful examples of actual applications of the steps. Each chapter includes examples from the author's experience and from published research tasks that encourage readers to relate the steps to their own experience, case studies, and suggestions for further reading that put readers in touch with others' experience. Curriculum or course design is largely a how-to-do-it activity that involves the integration of knowledge from many of the areas in the field of Applied Linguistics, such as language acquisition research, teaching methodology, assessment, language description, and materials production. Combining sound research theory with state-of-the-art practice, *Language Curriculum Design* is widely applicable for ESL/EFL language education courses around the world. *A Nicobarese Vocabulary: English-Nicobarese* Edward Horace Man, 1888
