## **The Changing World Britains Changing Countryside:**

**The Changing World and Africa** Xinfeng Li, Chunying An, 2021-11-19 This book brings contemporary Chinese scholarship into Africa the relations between African states and the relations between China and Africa into focus As China becomes the biggest partner for many African states constructing infrastructure across the continent Western scrutiny has increased This book offers a comprehensive look at what Chinese scholars have encountered on the ground as well as comparative studies of how different nations have engaged with Africa     Canals in a Changing Britain Jules P. Gehrke, 2024-12-15 This book assesses canals as a major technological system re shaping Britons relationship with their landscape and environment between 1760 and 1968 and argues this 200 year arc of historical experience is essential to understanding canals as sites of recreation leisure heritage and experience of the natural environment     **Environments in a Changing World** John Huckle, Adrian Martin, 2014-09-19 While there is no shortage of books on the environment there are few introductory texts that outline the social theory that informs human geographical approaches to the interactions between ecology and society Students arriving at university often lack the understanding of history economics politics sociology and philosophy that contemporary human geography requires Environments in a Changing World addresses this deficit providing foundation knowledge in a form that is accessible to first year students and applied to the understanding of both contemporary environmental issues and the challenge of sustainability Students are challenged to develop and defend their own ethical and political positions on sustainability and respond to the need for new forms of ecological citizenship

**Rural Modernity in Britain** Kristin Bluemel, 2018-09-17 No detailed description available for Rural Modernity in Britain

**The Changing American Countryside** Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers The Changing American Countryside a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public

policy but also suggest how the field of rural studies can greatly enrich our understanding of national life **Contesting Rurality** Michael Woods,2017-05-15 Rural issues have gained national prominence in Britain in recent years The future of hunting the Foot and Mouth outbreak farm income and agricultural reform and housing development have all claimed political and media attention promoted by a vocal rural lobby and headline grabbing protests and demonstrations Combining detailed empirical research and case studies with theoretically informed critical analysis this book provides an overview of the contemporary politics of the British countryside It explores how and why rural issues have suddenly achieved such political prominence by examining the changing politics and governance of rural Britain from the local to the national scale over the past century It investigates the social economic and institutional restructuring of rural communities and argues that we are witnessing not so much a rural politics but a politics of the rural in which the definition and representation of rurality itself has become the key focus of conflict

**The Greening of London, 1920-2000** Matti O. Hannikainen,2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities
