**Building Health Sciences Library Collections** Megan Inman, Marlena Rose, 2023-07-03 Selected as a 2025 Doody's Core Title. Collection development is a cornerstone of librarianship, and with the rapid pace that library materials are produced, a thorough knowledge of collection development is more important than ever before. However, with the myriad of choices available, creating a meaningful collection can be a daunting task. Building and maintaining a health sciences library collection can be a challenge, especially in scenarios where there is no dedicated collection services department or collection development librarian. Often in library school curriculum, collection development strategies are discussed, but specific examples of bibliographic sources may not be covered in detail, particularly for health sciences resources. Many collection development books often discuss the creation of policies, budgeting practices, and usability. This book is a comprehensive reference guide for those who will be creating and curating their library health sciences collections. Moving beyond a traditional list of titles, this guide will focus on several formats and areas. It features specific bibliographic information for top resources for a variety of subject areas and in a variety of formats. This book is designed for all librarians, whether new or experienced. Each chapter of this title does a deep dive into an area of health sciences library collection building, as well as covering how to maintain a current collection. This book is designed to provide readers with a resource to lean on in determining the best bets in providing their users with health sciences resources to support curriculum practice and other user needs. Readers who are interested in gleaned techniques for maintaining their health sciences library collection will also benefit from this how-to guide, as it details the deselection process. Every health sciences librarian, no matter their experience, can benefit from this reference guide.

## **Comprehensive Textbook of Community Health Nursing Including Environmental Science (Two Volume Set), First Edition - E-Book** Neerja Sood, Sakshi

Chaturvedi, 2025-04-07 This book has been written with student nurses' learning needs in mind, and it fully covers the Indian Nursing Council's new revised syllabus for nursing degree and diploma courses. Although it primarily intends to cater to the curriculum demands of BSc Nursing and GNM students, it will also be extremely valuable for students of various other streams studying community health courses, MLHP, CCH, and MPH courses. The main principles have been conveyed in clear terms from the students' perspective. The global and national health scenario and community health nursing principles are considered while explaining the role of community health nurses. Designed to meet the curricular needs of student nurses, relevant case studies and examples are included. Figures, tables, and pictures are placed in order to enhance logical thinking.

Recent research work in the relevant field is included in the content Contains short answer and long answer exam oriented questions at the end of chapters Provides additional multiple choice questions to help students have a firm grasp on the subject
