The Child's Discovery Of The Mind:

The Child's Discovery of the Mind Janet W. Astington, 1993 Three year old Emily greets her grandfather at the front door We're having a surprise party for your birthday And it's a secret We may smile at incidents like these but they illustrate the beginning of an important transition in children's lives their development of a theory of mind Emily certainly has some sense of her grandfather's feelings but she clearly doesn't understand much about what he knows and surprises like secrets tricks and lies all depend on understanding and manipulating what others think and know Jean Piaget investigated children's discovery of the mind in the 1920s and concluded that they had little understanding before the age of six But over the last twenty years researchers have begun to challenge his methods and revise his conclusions In *The Child's Discovery of the Mind* Janet Astington surveys this lively area of research in developmental psychology Sometime between the ages of two and five children begin to have insights into their own mental life and those of others They begin to understand mental representation that there is a difference between thoughts in the mind and things in the world between thinking about eating a cookie and eating a cookie This breakthrough reflects their emerging capacity to infer other people's thoughts wants feelings and perceptions from words and actions They come to understand why people act the way they do and can predict how they will act in the future so that by the age of five they are knowing participants in social interaction Astington highlights how crucial children's discovery of the mind is in their social and intellectual development by including a chapter on autistic children who fail to make this breakthrough Mind is a cultural construct that children discover as they acquire the language and social practices of their culture enabling them to make sense of the world Astington provides a valuable overview of current research and of the consequences of this discovery for intellectual and social development

The child's discovery of the mind by Janet W Astington Janet W. Astington, 1993 *Reasonable Children* Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it's dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping

promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education The Mind of the Child: The development of the intellect William T. Preyer,1889 Mind ,1923
