Francis Sales Betten, Alfred Kaufmann, 1919 Copernicus Owen Gingerich, 2016-07-01 In this Very Short Introduction leading historian of science Owen Gingerich offers a fascinating portrait of Nicolaus Copernicus 1473 1543 who developed the concept of a heliocentric universe and is a pivotal figure in the birth of modern science He depicts the Copernican revolution as the outcome of a new way of looking at the world in an era when political as well as religious beliefs were rapidly changing The Old Protestantism and the New Brian Gerrish, 2004-07-09 It is B A Gerrish s contention in his overview of Protestant ideas gathered together over a number of years that the significance of Protestant ideas cannot be appraised historically if Luther is made the sole point of reference or if the Reformation is treated as something other than a critical moment in a larger historical development to which liberal Protestantism also belongs Nor he maintains can ideas and doctrines be understood in abstraction from the religious experience they express The Old Protestantism and the New therefore redresses the present imbalance in historical studies of Protestantism by raising questions about the intellectual heritage of the Reformers in the modern world Gerrish s approach is shaped by three dominant interests Luther s relation to other Reformers especially Calvin the relationship between classical and liberal Protestant thought and the patterns of religious experience behind theological formulas The originality of the individual chapters which are written for historians as well as specialists in religious thought is enhanced by the way in which the book as a whole brings together pivotal thinkers including Erasmus Schleiermacher and Barth **Copernicus: Titan of Modern Astronomy** David C.
