forecasting attempts to predict the future characteristics of useful technological machines procedures or techniques

Primarily a technological forecast deals with the characteristics of technology such as levels of technical performance like speed of a military aircraft the power in watts of a particular future engine the accuracy or precision of a measuring

instrument the number of transistors in a chip in the year 2015 etc The forecast does not have to state how these

characteristics will be achieved Secondly technological forecasting usually deals with only useful machines procedures or techniques This is to exclude from the domain of technological forecasting those commodities services or techniques

intended for luxury or amusement **Forecasting Technology for Planning Decisions** Harry Jones, Brian C. Twiss, 1978
