Technology And Choice:

Strategic Investment Planning with Technology Choice in Manufacturing Systems Shan Ling Li, 2018-07-27 Originally published in 1994 this book examines problems related to investment planning capacity additions and choice of technology in dynamic manufacturing systems characterized by multiple products dynamic demand growth uncertainty in demand and availability of alternative technologies A model based methodology is developed that focuses on trade offs between flexible and conventional technology The research conducted for this book is directed to the development of tools to support investment decisions in production capacity over medium and long term planning horizons *Technology and Choice* Marcel C. LaFollette, 1991-01-01 Innovation the imaginative attempt to introduce something new or to solve some problem smashes routine and demands choice even if only the choice to retain the status quo This collection of fourteen essays provides a spectrum of historical perspectives on how when or why individuals societies governments and industries have made choices regarding the use of technologies *Technology Choice* Kelvin W Willoughby, 2019-07-09 This book attempts to provide a theoretical framework for answering difficult questions evoked by the concept of technology choice primarily by conducting a review of the Appropriate Technology movement and its ideas and experiments *The Choice of Technology in Road Construction* Jianfei Zhang, 1990 *Technology and the Development Process* Akin Fadahunsi, 1992 *Technology Choices* Diane E. Bailey, Paul M. Leonardi, 2015-01-30 An analysis of the occupational factors that shape the technology choices made by people who perform the same type of work Why do people who perform largely the same type of work make different technology choices in the workplace An automotive design engineer working in India for example finds advanced information and communication technologies essential allowing him to work with far flung colleagues a structural engineer in California relies more on paper based technologies for her everyday work and a software engineer in Silicon Valley operates on multiple digital levels simultaneously all day continuing after hours on a company supplied home computer and network connection In *Technology Choices* Diane Bailey and Paul Leonardi argue that occupational factors rather than personal preference or purely technological concerns strongly shape workers technology choices Drawing on extensive field work a decade s worth of observations and interviews in seven engineering firms in eight countries Bailey and Leonardi challenge the traditional views of technology choices technological determinism and social constructivism Their innovative occupational perspective allows them to explore how external forces shape ideas beliefs and norms in ways that steer individuals to particular technology choices albeit in somewhat predictable and generalizable ways They examine three relationships at the heart of technology choices human to technology technology to technology and human to human An occupational perspective they argue helps us not only to understand past technology choices but also to predict future ones *Technology Review* , 1928 *Handbook of Technology Management* Gerard H. Gaynor, 1996 Gives you an enterprise wide view of technology to help you manage your business as a system optimize investments in technology achieve efficient

business integration and monitor and measure TM effectiveness Detailed case studies illustrate the TM efforts of such organizations as Motorola and Digital Equipment

Managing Technology in Society Arie Rip, Thomas J. Misa, J. W. Schot, 1995 A fateful conceptual gap separates the policy makers and managers charged with promoting technology and the risk and technology assessors responsible for controlling it This hampers the effective use of many new technologies and prevents the development of others The strategy of constructive technology assessment CTA addresses this gap through facilitating societal learning processes and proposing a shared responsibility for the promotion and control of new technologies Combining analysis of both cases and concepts Managing Technology in Society confronts the underdevelopment of innovative potential for achieving goals of wealth sustainability and safety Factors that block change as well as conditions for successful learning are identified in a wide ranging selection of cases that encompass biotechnology clean technologies information and medical technologies The contributors build on the convergence of recent theories on technical change within economics sociology and the history of technology to offer suggestions for CTA action and so create a new paradigm of managing technology in society BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
