## **Telecommunications For Local Government:**

*The Electronic Communications Code and Property Law* Falcon Chambers, 2018-10-11 Life now without access to electronic telecommunications would be regarded as highly unsatisfactory by most of the UK population. Such ready access would not have been achieved without methodical and ultimately enforceable means of access to the land on which to install the infrastructure necessary to support the development of an electronic communications network. Successive governments have made such access a priority regarding it as a principle that no person should unreasonably be denied access to an electronic communications network or electronic communications services. The enactment of the Telecommunications Act 1984 and its revision by the Communications Act in 2003 have played their role in the provision of an extensive electronic infrastructure in the UK while their reshaping by means of the Digital Economy Act 2017 will continue that process. Throughout that process a little publicised series of struggles has taken place between telecommunications operators and landowners as they seek to interpret the Electronic Communications Code by which their rights and obligations have been regulated. This book describes the problems that accompanied the Old Code which will continue to regulate existing installations and agreements and the intended solutions under the New Code. The eminent team of authors explain the background provisions and operation of the old code and the new one providing practical and jargon free guidance throughout. It is sure to become the reference on this topic and is intended as a guide for telecommunications operators, land owners and of course for their advisers in the legal and surveying professions. All members of Falcon Chambers comprising nine Queen's Counsel and 30 junior barristers specialise in property law and allied topics including the various incarnations of the Electronic Communications Code. Members of Falcon Chambers including all the authors of this new work have for many years lectured and written widely on the code and have appeared acting for both operators and landowners in many of the few reported cases on the subject of the interface between property law and the code including for example *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2010 *Geo Networks Ltd v The Bridgewater Canal Co Ltd* 2011 *Crest Nicholson Operations Ltd v Arqiva Services Ltd* 2015 *Brophy v Vodafone Ltd* 2017

**Infrastructure Planning and Finance** Vicki Elmer, Adam Leigland, 2013-11-07 Infrastructure Planning and Finance is a non technical guide to the engineering planning and financing of major infrastructure projects in the United States providing both step by step guidance and a broad overview of the technical, political and economic challenges of creating lasting infrastructure in the 21st Century. Infrastructure Planning and Finance is designed for the local practitioner or student who wants to learn the basics of how to develop an infrastructure plan, a program or an individual infrastructure project. A team of authors with experience in public works planning and city government explain the history and economic environment of infrastructure and capital planning, addressing common tools like the comprehensive plan, sustainability plans and local regulations. The book guides readers through the preparation and development of comprehensive plans and infrastructure projects and through major funding

mechanisms from bonds user fees and impact fees to privatization and competition The rest of the book describes the individual infrastructure systems their elements current issues and a how to do it section that covers the system and the comprehensive plan development regulations and how it can be financed Innovations such as decentralization green and blue green technologies are described as well as local policy actions to achieve a more sustainable city are also addressed Chapters include water wastewater solid waste streets transportation airports ports community facilities parks schools energy and telecommunications Attention is given to how local policies can ensure a sustainable and climate friendly infrastructure system and how planning for them can be integrated across disciplines
