Telematic Society A Challenge For Tomorrow:

    <u>Telematic Society</u> James Martin,1981   <u>The Social Significance of Telematics</u> Lars Qvortrup,1984-01-01 The assumption underlying this book is that we are facing a societal transformation a silent revolution in fact with consequences at least as far reaching as those of the Industrial Revolution The author of this book wants to intervene in the current discussion about this revolution a discussion which is normally colored by a resigned determinism maintaining that the transformation will come about all by itself as an automatic consequence of the development of technology As opposed to this the author wants to politicize the debate by insisting on the fact that this silent revolution is not inextricably tied to the automatically whirring computer discs of technological development but is dependent on a number of political choices

    Tendencies and Tensions of the Information Age Jorge Reina Schement,2018-04-24 The development of technology and the hunger for information has caused a wave of change in daily life in America Nearly every American s environment now consists of cable television video cassette players answering machines fax machines and personal computers Schement and Curtis argue that the information age has evolved gradually throughout the twentieth century National focus on the production and distribution of information stems directly from the organizing principles and realities of the market system not from a revolution sparked by the invention of the computer Now available in paperback Tendencies and Tensions of the Information Age brings together findings from many disciplines including classical studies etymology political sociology and macroeconomics This valuable resource will be enjoyed by sociologists historians and scholars of communication and information studies   <u>Philosophy and Technology II</u> Carl Mitcham,Alois Huning,2012-12-06 Until recently the philosophy and history of science proceeded in a separate way from the philosophy and history of technology and indeed with respect to both science and technology philosophical and historical inquiries were also following their separate ways Now we see in the past quarter century how the philosophy of science has been profoundly in fluenced by historical studies of the sciences and no longer concerned so single mindedly with the analysis of theory and explanation with the re lation between hypotheses and experimental observation Now also we see the traditional historical studies of technology supplemented by phi losophical questions and no longer so plainly focussed upon contexts of application on invention and practical engineering and on the mutually stimulating relations between technology and society Further alas the neat division of intellectual labor those clearly drawn distinctions be tween science and technology between the theoretical and the applied between discovery and justification between internalist and externalist approaches all all have become muddled Partly this is due to internal revolutions within the philosophy and his tory of science the first result being recognition of their mutual rele vance Partly however this state of muddle is due to external factors science at the least in the last half century has become so intimately connected with technology and technological developments have cre ated so many new fields of scientific and philosophical inquiry that any critical reflection on scientific and technological endeavors must hence forth take their interaction into
