Enrico Terrone, Vera Tripodi

Technology And Values:

New Perspectives on Technology, Values, and Ethics Wenceslao J. Gonzalez, 2015-10-08 This book focuses on a key issue today the role of values in technology with special emphasis on ethical values This topic involves the analysis of internal values in technology as they affect objectives processes and outcomes and the study of external values in technology social cultural economic ecological etc These values internal and external are crucial to the decision making of engineers In addition they have increasing relevance for citizens concerned with the present and future state of technology which gives society a leading position in technological issues The book follows three main lines of research 1 new perspectives on technology values and ethics 2 rationality and responsibility in technology and 3 technology and risks This volume analyzes the two main sides involved here the theoretical basis for the role of values in technology and a practical discussion on how to implement them in our society Thus the book is of interest for philosophers engineers academics of different fields and policy makers The style used lends itself to broad audience

Technology and Values Kristin Shrader-Frechette, Laura Westra, 1997-10-30 Technology and Values provides a highly useful collection of essays organized around issues related to science technology public health economics the environment and ethical theory The editors present effective introductions that provide background information as well as philosophical tools and case studies to facilitate understanding of the variety of issues emanating from the most significant developments in technology including the effects on privacy of the widespread use of computers to store and retrieve personal information and the ethical considerations of genetic engineering

Technology and Values - Essential Readings with Philosophy of Technology SET Craig Hanks, 2010-12-01

The New Technology and Human Values John G. Burke, 1972

Values, Technology and Work E. Mumford, 2013-03-07 This book describes the experiences of four organizations who tried to introduce new computer systems in a humanistic manner so that human as well as business gains would be derived from the introduction of technology All four paid a great deal of attention to identifying efficiency and job satisfaction needs and to designing the technical system and its surrounding organizational context in such a way that these needs could be effectively met Nevertheless as with all major change the change process was difficult and demanding and considerable management skill and insight was required before successful systems were implemented The author set out to identify the extent to which the values of the different groups involved in the design process influenced the way in which computer systems were designed and implemented She also wished to establish the extent to which the values of technical systems designers user management and user clerks converged or diverged in the change process It is hoped that the ideas set out here will contribute both to a greater theoretical understanding of the influences which affect technical change and to the practical design of humanistic computer systems The research was carried out in three large government departments two industrial firms and an international bank Two of the government departments asked for their data to remain confidential and so these are not described in detail in the book

The book is in twelve chapters **Technology, Values, and Society** Mitra Das, Shirley Kolack, 2008 Technology is not value free nor does it exist in a vacuum It needs a social basis technology is affected by society and influences it Technology Values and Society illustrates this using an examination of cross cultural case studies representing simple intermediate and complex societies Certain forms of technology exist when conducive values and structures sustain them However this relationship is not one way Technological changes do precipitate social and value changes It is impossible to sustain egalitarian values in a society involving technology based on hierarchical relationships Understanding this connection is vital if we are to keep some control over the way in which technology affects us This revised edition brings the topic to life for both faculty and students

Living in a Technological Culture Hans Oberdiek, Mary Tiles, 2005-11-02 Technology is no longer confined to the laboratory but has become an established part of our daily lives Its sophistication offers us power beyond our human capacity which can either dazzle or threaten it depends who is in control Living in a Technological Culture challenges traditionally held assumptions about the relationship between man and machine It argues that contemporary science does not shape technology but is shaped by it Neither discipline exists in a moral vacuum both are determined by politics rather than scientific inquiry By questioning our existing uses of technology this book opens up wider debate on the shape of things to come and whether we should be trying to change them now As an introduction to the philosophy of technology this will be valuable to students but will be equally engaging for the general reader **Values and the Future** Kurt Baier, Nicholas Rescher, 1969 An investigation into the impact of current technological advances on American values **Technology and Values** Harvard University. Program on Technology and Society, 1969 Technology and Values Craig Hanks, 2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics **Technology as Institutionally Related to Human Values** Martin Green, 1974 Technology and Values Irene Taviss, Linda Silverman, 1969 *Being and Value in Technology* Enrico Terrone, Vera Tripodi, 2023-01-18

Despite numerous publications on the philosophy of technology little attention has been paid to the relationship between being and value in technology two aspects which are usually treated separately This volume addresses this issue by drawing connections between the ontology of technology on the one hand and technology's ethical and aesthetic significance on the other The book first considers what technology is and what kind of entities it produces Then it examines the moral implications of technology Finally it explores the connections between technology and the arts **Social Values and the**

Development of Technology Janusz Wojciech Gołębiowski,1982 **Technology, Values and Society** Mitra Das,1990

Changing Our Minds S. Kay Toombs,2016 From the moment of birth children in this society grow up in a home social and educational environment permeated by digital technology Ninety five percent of teens are online and an increasing number of infants under one year old now regularly use tablets and other mobile devices What will this new technology laden environment mean for our culture Citing a wide variety of neurological sociological and psychological research studies this book considers the effects of this unprecedented change on the lives of the young as well as detailing how these technologies are changing the way we think and radically altering our relationship with nature with reality and with each other back

Science, Technology and Society ,1981 *LES Nouvelles* ,1989 **Toward Century 21** Charanjit S. Wallia,1970

African Values, Ethics, and Technology Beatrice Dedaa Okyere-Manu,2021 This book charts technological developments from an African ethical perspective It explores the idea that while certain technologies have benefited Africans the fact that these technologies were designed and produced in and for a different setting leads to conflicts with African ethical values Written in a simple and engaging style the authors apply an African ethical lens to themes such as The Fourth Industrial Revolution the moral status of technology technology and sexual relations and bioethics and technology Beatrice Dedaa Okyere Manu is Senior Lecturer in Applied Ethics in the School of Religion Philosophy and Classics at the University of KwaZulu Natal South Africa where she is also the Director of the Ethics Studies Department
