## **The Disunity Of Science Boundaries Contexts And Power:**

*The Disunity of Science* Peter Louis Galison, David J. Stump, 1996 Is science unified or disunified Over the last century the question has raised the interest and hackles of scientists philosophers historians and sociologists of science for at stake is how science and society fit together Recent years have seen a turn largely against the rhetoric of unity ranging from the plea of condensed matter physicists for disciplinary autonomy all the way to discussions in the humanities and social sciences that involve local history feminism multiculturalism postmodernism scientific relativism and realism and social constructivism Many of these varied aspects of the debate over the disunity of science are reflected in this volume which brings together a number of scholars studying science who otherwise have had little to say to each other feminist theorists philosophers of science sociologists of science How does the context of discovery shape knowledge What are the philosophical consequences of a disunified science Does for example an antirealism a realism or an arealism become defensible within a picture of local scientific knowledge What politics lies behind and follows from a picture of the world of science more like a quilt than a pyramid Who gains and loses if representation of science has standards that vary from place to place field to field and practitioner to practitioner

**Special Sciences and the Unity of Science** Olga Pombo, Juan Manuel Torres, John Symons, Shahid Rahman, 2012-02-01 Science is a dynamic process in which the assimilation of new phenomena perspectives and hypotheses into the scientific corpus takes place slowly The apparent disunity of the sciences is the unavoidable consequence of this gradual integration process Some thinkers label this dynamical circumstance a crisis However a retrospective view of the practical results of the scientific enterprise and of science itself grants us a clear view of the unity of the human knowledge seeking enterprise This book provides many arguments case studies and examples in favor of the unity of science These contributions touch upon various scientific perspectives and disciplines such as Physics Computer Science Biology Neuroscience Cognitive Psychology and Economics

[Handbook of Archaeological Theories](#) R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2007-11-09 This handbook gathers original authoritative articles from leading archaeologists to compile the latest thinking about archaeological theory The authors provide a comprehensive picture of the theoretical foundations by which archaeologists contextualize and analyze their archaeological data Student readers will also gain a sense of the immense power that theory has for building interpretations of the past while recognizing the wonderful archaeological traditions that created it An extensive bibliography is included This volume is the single most important reference for current information on contemporary archaeological theories

*Intercultural Communication and Science and Technology Studies* Luis Reyes-Galindo, Tiago Ribeiro Duarte, 2017-08-18 This timely and engaging book addresses communicative issues that arise when science and technology travel across socio cultural boundaries The authors discuss interactions between different scientific communities scientists and policy makers science and the public scientists and artists and other situations where science clashes with other socio cultural domains The volume includes theoretical

proposals of how to deal with intercultural communication related to science and technology as well as rich case studies that illustrate the challenges and strategies deployed in these situations Individual studies explore Europe Latin America and Africa thus including diverse Global North and South contexts

**Critical Social Psychology** Tomás Ibáñez, Lupicinio Íñiguez, 1997-04-28 Much recent work in social psychology has questioned the assumptions and practices of traditional research and debate Accessible and often passionately argued this book pulls these new trends together in a major overview of the main theoretical political and empirical developments Assembling a group of leading figures in the field the book addresses the need for a critical perspective in social psychology and examines the many levels of discussion that have informed that critique The contributors encompass such key topics as political analysis in a postmodern world the status of qualitative methods realism versus relativism and the question of subjectivity from a critical perspective

**Historicization** Glenn W. Most, 2001 Historisierung die Überzeugung dass die Phänomene die eine Wissenschaft untersucht wesentlich durch ihre spezifische Geschichtlichkeit bestimmt sind und dass daher Pflicht und Ziel der Wissenschaft in der Erforschung dieser Geschichtlichkeit bestehen ist nicht so sehr eine besondere Praxis oder Disziplin innerhalb der Philologie sondern eine methodologische Voraussetzung die sich in vielen verschiedenen Disziplinen und in einer Reihe verschiedener wissenschaftlicher Praktiken manifestiert Insofern stellt sich das Thema dieses Bandes im Vergleich zu denjenigen der fruheren Bande dieser Reihe als eine Erweiterung und Vertiefung dar Von der Historisierung wird meistens historisierend behauptet sie sei eine spezifisch europäische Entwicklung und habe sich insbesondere im Verlaufe des 18 und 19 Jahrhunderts herausgebildet Ziel dieses Bandes ist es die Rolle der Historisierung in verschiedenen Disziplinen vor allem während der letzten zwei Jahrhunderte exemplarisch zu untersuchen um solche

Behauptungen kritisch zu prüfen und um damit zu einem differenzierteren und präziseren Verständnis des Gesamtphänomens der Historisierung zu gelangen. Dabei wird die Rolle der Historisierung in solchen Disziplinen wie Philologie, Religionswissenschaft, Wissenschaftsgeschichte, Kunstgeschichte, Geschichte, Archäologie und Anthropologie untersucht. Die meisten Beiträge des Bandes gehen zurück auf das von Glenn W. Most im Sommer 1998 veranstaltete 4. Heidelberger Kolloquium zu historischen und methodologischen Fragen der Philologie.

**Social History of Science in Colonial India** S. Irfan Habib, Zaheer Baber, 2007. Can science be seen as the flag bearer of the civilizing mission dispelling the darkness of centuries of superstition? Did the installation of new technological systems displace ancient primitive techniques? Rejecting the simplistic notion of transmission of science and technology, this reader argues for a variety of perspectives. Part of the prestigious Themes in Indian History series, it provides an excellent introduction to the world of science and technology in colonial India. Departing from the standard practice of seeing science as a cultural universal, *Social History of Science* emphasizes the need for redrawing boundaries long taken for granted. It investigates how modern science, considered as a pristine Western cultural import, was reconstituted in the encounter with other ways of knowing and acting on the world. Bringing together some of the finest writings even rare on the subject, this volume highlights the multiplicity of historiographic positions on colonial science and the changing landscapes for the study of science in South Asia. The contributors approach issues related to science and colonialism from a variety of scientific disciplines. They engage with the drift produced by the entanglement of science and values and the complicity of the scientific project in that of imperialism.

**Rethinking Theology and Science** Niels Henrik Gregersen, Jacobus Wentzel Van Huyssteen, 1998. In this volume six leading American and European scientist-theologians rethink the relationship of theology and science under the growing challenge of pluralism.

**(Post) Modern Science (education)** John A. Weaver, Peter Michael Appelbaum, Marla Morris, 2001. These original essays offer new perspectives for science educators, curriculum theorists, and cultural critics on science education. French post-structural thought and the science debates. Included in this book are chapters on the work of Bruno Latour, Michel Serres, and Jean Baudrillard, plus chapters on postmodern approaches to science education and critiques of modern scientific assumptions in curriculum development.

**Rethinking Science, Technology, and Social Change** Ralph Schroeder, 2007. *Rethinking Science, Technology, and Social Change* challenges the prevailing notion that science and technology are constructed or socially shaped. The text puts forth a case for technological determinism based on a realistic and pragmatic account of science and technology informed by historical comparisons. Schroeder begins by exploring the social organization of scientific and technological advances, the intersecting trajectories of big science and technological systems, and the impact of science and technology on economic change. He goes on to discuss the social implications of technology, including the way that it affects politics and consumption.

The book then rethinks traditional theories about the relationship between science technology and social change The argument presented shifts the debate on topics such as the relationship between growth and sustainability and thus has important policy implications This book will be of great interest to scholars scientists and anyone interested in understanding how science and technology are transforming our world     History After the Three Worlds Arif Dirlik,Vinay Bahl,Peter Gran,2000-11-22 This ambitious volume provides a comparative perspective on the challenges facing the discipline of history as Eurocentrism fades as a lens for viewing the world Exploring the state of history and the struggle over its ownership throughout the world the authors address the issues of globalization postmodernism and postcolonialism that have been largely ignored by practicing historians despite their importance to cultural studies and their relevance to history Engaging in a vigorous critique of Eurocentrism the volume at the same time reaffirms the importance of historical ways of knowing
