**The Defense Management Challenge** J. Ronald Fox,1988-06-01      **The Defense Management Challenge** John Ronald Fox,James L. Field,1988      **Needs and Opportunities in the Modern History of the U.S. Navy** Michael J. Crawford,2018 This is a compilation of a series of papers presented in conjunction with a year long lecture series sponsored by the Naval History and Heritage Command Provided by publisher      **Public Procurement and the EU Competition Rules** Albert Sánchez Graells,2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law      **The Pursuit of Technological Superiority and the Shrinking American Military** Daniel R. Lake,2019-01-22 Why has the US military begun to suffer from overstretch in recent decades Why is one of the largest militaries in the world and the most expensive by far periodically stressed by the operational demands placed upon it This book argues that recent problems with overstretch are the result of a heavy reliance on technology to solve tactical and strategic problems Over the last seven decades the US armed services have consistently chosen to push the technological frontier out in an effort to first gain and then maintain qualitative superiority over potential foes The high procurement and support costs associated with cutting edge weapon systems has resulted in a military that is shrinking in both absolute size and in the relative share of combat forces The culmination of this process is a US military that increasingly lacks the capacity needed to conduct operations without putting significant stress on its personnel and equipment Lake argues that this pattern is a manifestation of an American cultural disposition favoring technology He shows that this affinity for technology is present in the organizational cultures of all the armed services though not to the same degree By examining procurement programs for each armed service this book reveals how attempts to develop and leverage superior technology has resulted in

some notable program failures high procurement costs for the latest generation of equipment with associated production cuts and the high support requirements that are causing the relative share of combat forces to shrink Lake's analysis of recent initiatives by the armed services suggests that this pattern is likely to continue with the US military remaining prone to overstretch whenever its operational tempo increases above the peacetime baseline A Soldier Supporting Soldiers

College (U.S.), 1989 Naval War College Review, 1989 The Political Economy of Defense Andrew Ross, 1991-07-30 Beyond the traditional two-dimensional analyses of defense economics and defense politics lies a rapidly growing field of research. The political economy of defense As the study of the interface between economics, politics, and defense proliferates, this collective volume sets out to identify the nature of political economy of defense inquiry, surpassing a narrower focus on the economic consequences of military spending. The starting point for this collaborative effort was a series of panel discussions organized by Andrew L. Ross in which most of the contributors to this volume participated. The majority of chapters were written expressly for this book and have not been previously published. These analytical and empirical investigations are intended to illustrate the broad, encompassing scope of political economy of defense research and contribute to the development of a research agenda. Andrew L. Ross has brought together a timely and significant array of

inquiry into the impact of defense spending on world politics and global economics This book will be of great interest to political scientists defense specialists and economists studying the military industrial complex **Invitation to Struggle** Cecil V.
