The Annual Register Edmund Burke, 1873 Continuation of the reference work that originated with Robert Dodsley

written and published each year which records and analyzes the year's major events, developments and trends in Great Britain and throughout the world. From the 1920s, volumes of *The Annual Register* took the essential shape in which they have continued ever since, opening with the history of Britain, then a section on foreign history covering each country or region in turn. Following these are the chronicle of events, brief retrospectives on the year's cultural and economic developments, a short selection of documents and obituaries of eminent persons who died in the year.

Edmund Burke, 1873 **The Annual Register**, 1873 Stock Markets, Speculative Bubbles and Economic Growth Mathias Binswanger, 1999

Binswanger, 1999. Binswanger, economics, the University of Applied Sciences, Switzerland, sheds new light on the role of speculative bubbles in the stock market and argues that bubbles may have a positive effect. He refutes arguments that bubbles increase instability and contends that bubbles may provide additional investment opportunities with the potential to increase aggregate profits. He demonstrates that highly sophisticated financial systems are needed in order to allow for positive effects to develop and examines recent experience in Asia where destabilizing effects of bubbles outweighed potential benefits.
