Finding Money - the Small Business Guide to Financing Kate Lister, Tom Harnish, 2010-04-17 Finding money is an art you can learn. You can learn who has money, how they operate, and how you can convince them to lend or invest in your business. This book will answer your questions about what kinds of loans, grants, and other financing are available. How much money should I borrow or raise? What kind of small business loans or investment am I likely to qualify for? How do I prepare a business loan application or investment prospectus? How do I prepare a cash flow proforma? How do I go about finding venture capital or angel investors? What can I do to bootstrap my business if I can't find a lender or investor? If you're an entrepreneur starting a business, planning a home-based business, or running a fast-growing firm, *Finding Money* will help you finance your dream. One of the best books I've ever read on the subject. David Thornburgh, Director, Wharton Small Business Development Center.

Fire in the Belly Jerry D. Neal, Jerry Bledsoe, 2020-01-17 When Bill Pratt and Powell Seymour got laid off from their technology jobs in Greensboro, North Carolina, in 1991, they had no idea that they were about to become leaders of a revolution in electronic communications. They did know that they wanted to start their own company, although they had no means to fund it. They asked their friend Jerry Neal to leave his job at the same company and join them to raise money and market their products. Those products numbered only seven at the time, and they could fit in a small matchbox with plenty of room to spare. But they were unlike any other products. Bill Pratt had designed the first radio frequency integrated circuits, the semiconductor chips that would make the cell phone phenomenon possible. Within a year of starting the company, Pratt had designed another chip, the first power amplifier using an exotic technology that many considered unreliable and impossible to commercialize. Although the chip failed at first, it became a company builder. Now more than half of the cell phones made in the world contain power amplifiers made by RF Micro Devices of Greensboro, the world's leading supplier. The company has plants and offices around the world and has broadened its reach into every aspect of wireless electronic communications. Jerry Neal's revealing, entertaining, often funny account of how this came about is much more than a story of one company's beginnings. It's a wild ride through the technology boom of the 1990s, at the peak of which just nine years after its founding, RF Micro Devices had a market value of 16 billion, twice that of its technology partner, the huge, long-established defense contractor TRW. *Fire in the Belly* should be a handbook for entrepreneurs and a textbook for college business majors.
