Wilderer, Martin Grambow, Michael Molls, Konrad Oexle, 2021-09-20 This volume builds on an international workshop held in 2019 inspired by James Lovelock's *The Revenge of Gaia* Why the Earth Is Fighting Back and How We Can Still Save Humanity It therefore understands the Gaia concept as an umbrella term for the living world that planet Earth is hosting for nearly 4 billion years Humankind has intervened in this ecosystem since its emergence on the planet about 2.5 million years ago often with painful consequences for itself In its reactions the Earth system follows only the laws of nature Consequently humanity needs to

The Face of the Earth J. Donald Hughes, 2015-05-11 Although the organizing principle of virtually every world history text is development the editor of this volume maintains that this traditional approach fails to address the issue of sustainability By adopting the ecological process as their major theme the authors show how the process of human interaction with the natural environment unfolded in the past and offer perspective on the ecological crises in our world at the beginning of the 21st century Topics range from broad regional studies that examine important aspects of the global environment that affect nations to a study of the widespread influence of one important individual on his nation and beyond The authors take different approaches but all share the conviction that world history must take ecological process seriously and they all recognize the ways in which the living and non living systems of the earth have influenced the course of human affairs
