**When**

**Doctors Get Sick** H.N. Mandell,H.M. Spiro,1987-09-30 When a doctor gets sick his status changes No longer is his role defined as deriving from *doctus* i e learned but as from *patiens* the present participle of the deponent verb *patior* i e to suffer with all the passive acceptance of pain the verb implies From *passus* the past participle we get the word *passion* with its wide gamut of emotional allusions ranging from animal lust to the sufferings of martyrs It is the connotation not the denotation of the word that defines the change of status When a doctor is sick enough to be admitted to a hospital he can no longer write orders orders are written about him removing him from control of his own situation One recalls a sonnet from W H Auden s sequence *The Quest* which closes with the lines Unluckily they were their situation One should not give a poisoner medicine A conjuror fine apparatus Nor a rifle to a melancholic bore That is a reasonable expression of twentieth century skepticism and rationalism Almost all medical literature is written from the doctor s point of view Only a few medically trained writers one thinks of Chekhov s *Ward Six* manage to incorporate the patient s response to his situation Patients voices were not much in evidence until well into the twentieth century but an early example is John Donne s *Devotions upon Emergent Occasions* 1624

Presentations of Medical Illness R.C.W. Hall,2012-12-06 When my colleagues and I began the task of assembling this volume several difficult questions arose For whom were we writing Was the purpose to elucidate psychiatric or medical presentation Should references reflect specific to medical areas or lead the reader to a more general view of a particular topic Would a

symptom or system approach best serve the reader. Should the volume cover a few areas in detail or attempt to survey a larger area of knowledge? The present text reflects an attempt to answer these questions. It is designed for the student of medicine who desires a broader understanding of those medical illnesses that produce psychiatric aberration. We hope it will be of assistance to the medical student or house officer studying medicine, neurology, family practice, pediatrics, or psychiatry, as well as to the practicing clinician who wishes a refresher on this subject or a reference for his library. The text is intended to strike a useful balance between medicine and psychiatry by providing a list of differentials for specific symptoms or conditions, as well as suggestions for medical evaluation. References have been chosen which we hope will assist the reader in further study. We have attempted to diversify them and list a spectrum of articles that deal with both academic and practical treatment considerations. The initial volume is divided into four sections that address both a symptom and system approach.
