The Dome:

The Dome of Eden Stephen H. Webb, 2010-01-01 What would biology look like if it took the problem of natural evil seriously? This book argues that biological descriptions of evolution are inherently moral just as the biblical story of creation has biological implications. A complete account of evolution will therefore require theological input. The Dome of Eden does not try to harmonize evolution and creation. Harmonizers typically begin with Darwinism and then try to add just enough religion to make evolution more palatable or they begin with Genesis and pry open the creation account just wide enough to let in a little bit of evolution. By contrast, Stephen Webb provides a theory of how evolution and theology fit together and he argues that this kind of theory is required by the internal demands of both theology and biology. The Dome of Eden also develops a theological account of evolution that is distinct from the intelligent design movement. Webb shows how intelligent design properly discerns the inescapable dimension of purpose in nature but like Darwinism itself fails to make sense of the problem of natural evil. Finally, this book draws on the work of Karl Barth to advance a new reading of the Genesis narrative and the theology of Duns Scotus to provide the necessary metaphysical foundation for evolutionary thought.

2 at the Dome Dylan Beckerman, 2011-06-10 Paul Westfield had left for the longest mission in NASA history. Magellan the first manned mission past the orbit of Saturn and his son Casey was only ten years old. A mission long enough that internment into stasis was necessary. Shortly after the wake up call the Magellan mission went MIA and Casey would be wondering what actually happened to his dad and that mission for a long time to come. Now Casey has become an astronaut himself and thanks to the discovery of a chamber inside the face on Mars he has been chosen by the United World Space Agency to go on the most prolific mission in human history 80 000 light years to the other side of the galaxy to visit a society that predates humans by well over a billion years. With a tour guide to help he has to remember as much as he can because its a one time offer to exist in a completely alien world and then return with all his experiences and information. Then an opportunity arises and Casey feels he should roll the dice. Everything is not quite what it seems though and Casey must survive the court appearance of a lifetime along with making a decision that could reduce the human race to a footnote in the galactic history log.

Under the Dome Alan M. Hantman, 2024-05-01 An inside account of politics, crisis, and architecture on Capitol Hill. The domed US Capitol Building is recognized around the world as America's most iconic symbol, the forum for representative democracy and the physical stage for the transfer of executive power. As the United States grew in size and complexity, the Capitol was built, rebuilt, enlarged, and extended many times under the direction of the few who have served as Architect of the Capitol. This official heads the agency dedicated to preserving and upgrading this magnificent structure and all the buildings and grounds of Capitol Hill. In *Under the Dome*, Alan Hantman, the Architect of the Capitol from 1997 to 2007, provides a personal account of how the Capitol works as a physical space, who runs it, how and why decisions are made about the security of the Capitol and the people who work there, and how politicians think about the Capitol Building. He also

recounts security threats to the Capitol during his tenure including the 1998 shooting murder of two police officers and the Capitol evacuation on 9 11 as a hijacked airplane approached that underscore one of his greatest challenges as Architect The tension between securing the Capitol and opening it to the public drove the design and construction under his direction of the Capitol Visitor Center the largest expansion of the Capitol in its history increasing its size by 70% *UNDER THE DOME, BOOK 2, WHO AM I?
