Gao, Hermann Kopetz, Lisa Kleinjohann, Achim Rettberg, 2006-04-11 The IFIP TC 10 Working Conference on Distributed and Parallel Embedded Systems DIPES 2004 brings together experts from industry and academia to discuss recent developments in this important and growing field in the splendid city of Toulouse France The ever decreasing price performance ratio of microcontrollers makes it economically attractive to replace more and more conventional mechanical or electronic control systems within many products by embedded real time computer systems An embedded real time computer system is always part of a well specified larger system which we call an intelligent product Although most intelligent products start out as stand alone units many of them are required to interact with other systems at a later stage At present many industries are in the middle of this transition from stand alone products to networked embedded systems This transition requires reflection and architecting The complexity of the evolving distributed artifact can only be controlled if careful planning and principled design methods replace the hoc engineering of the first version of many standalone embedded products Resource Allocation for Software Defined Networks Dariusz Gasior, 2021-01-06 The book is devoted to the selected resource allocation problems in Software Defined Networks Moreover it covers results concerning Software Defined Wide Area Networks SD WANs which is one of the current networking hot topics The variety of different cases is considered including virtualization and information centric paradigm For each case the mathematical model together with the problem formulation is given and some solution algorithms are proposed The algorithms are discussed and evaluated mostly with simulations *The Prostate Cancer Primer* Nicholas Hild, Nicholas R. Hild Ph. D., 2004-03 The impact of advances in medical technologies is beginning to reveal that Prostate Cancer is a much larger problem than the general public perceives Newer tools for diagnosing tiny microscopic cancer cells in younger men have caused the medical community to recommend that men in their early 40 s get a PSA Cancer screen with routine physical exams instead of waiting until they are in their late 50 s only then to discover cancer is present The medical community is not doing a good job of communicating that we may be heading for a pandemic if diagnosis and treatment is not routinely conducted in younger and younger men The Prostate Cancer Primer is the culmination of a research professor s intense effort to learn about current options that are available for preventing cancer suggestions for understanding what currently available treatment options their are complete with side effects how to choose which treatment is right for today s health conscious adult man and his family Oncologists and urologists interviewed for this Primer are in basic agreement that too little communication exists between the medical community and men who need to know what their prostate options are This compilation of research is aimed at filling that void for all men who are interested in living a healthful life Methods of Historical Study
