## **Sonic Self Musical Subjectivity And Signification:**

*The Sonic Self* Naomi Cumming, 2000 Semioticians began by looking at literature but have gradually applied their techniques to other disciplines including music The late Naomi Cumming based this consideration of the sources of musical expression on her experiences as a performer with interesting if rarely surprising results Choice Using classical violin music as her principal laboratory the author examines how a performance incorporates distinctive features not only of the work but of the performer as well and how the listener goes about interpreting not only the composer's work and the performer's rendering of the work but also of the performer's and listener's identities A richly interdisciplinary approach to a very common yet persistently mysterious part of our lives [Music, Subjectivity, and Schumann](#) Benedict Taylor, 2022-04-07

What is musical subjectivity Drawing on philosophy and critical theory Benedict Taylor investigates this concept in relation to Schumann *The Pastoral in Charles Griffes's Music* Taylor A. Greer, 2024-06-18 At the turn of the century visionary composer Charles Tomlinson Griffes synthesized highly diverse elements from other musical traditions into his distinct artistic voice As American as he was far ranging in his interests Griffes was an aesthetic polyglot combining elements of literature visual arts global folk melodies and contemporary European art music into a new musical language The breadth of his sources of inspiration are breathtaking including the sensual harmonies of fin de siècle French music the British Aesthetic Movement folk music drawn from the Middle East and Java and a wide range of poets including William Blake Samuel Taylor Coleridge and William Sharp *The Pastoral in Charles Griffes's Music* explores both his music and the rich historical context from which it grew to enrich our understanding of the composer's artistic contribution and reveal new intersections and contradictions in European and American culture during the early twentieth century Taylor A Greer also critiques the philosophical foundation of topic theory and its relationship to the pastoral in Griffes's music to reflect on the end of the nineteenth century and clarify our understanding of his artistic influences With Griffes's conception of the pastoral he transformed the siciliana based tradition he inherited from the eighteenth century into a new and vibrant genre that preserved the usual associations of simplicity and tranquility and introduced new elements of tension into the pastoral ideal including global voices paradox and occasional conflict [Music Production Cultures](#) Brendan Anthony, 2022-12-26

*Music Production Cultures* draws on interviews with international educators surveys completed by students of music production from around the globe doctoral research findings and contextualised career experiences from the author as a celebrated music producer to explore how effective learning environments can be created for popular music production in higher education Acknowledging the musical technological and social diversity in global popular music production practice this book highlights the integral elements that educators and their institutions must consider in order to provide high quality and relevant education for the students of today and into the future Offering concepts approaches and practices to be integrated into diverse music production pedagogical frameworks in higher education this book considers the pedagogical approaches

and goals that bridge music production education to the industry using examples and insights from international educators throughout as well as lesson plan examples for instructors Music Production Cultures develops a foundation of practice to inform teachers designing equitable diverse and inclusive pedagogies that are dependent on the musical cultural and social influences of their students This is an invaluable resource for educators and researchers in the area of audio education looking to develop their pedagogical strategies

*Rethinking Music through Science and Technology Studies* Antoine Hennion, Christophe Levaux, 2021-05-03 This volume seeks to offer a new approach to the study of music through the lens of recent works in science and technology studies STS which propose that facts are neither absolute truths nor completely relative but emerge from an intensely collective process of construction Applied to the study of music this approach enables us to reconcile the human social factual and technological aspects of the musical world and opens the prospect of new areas of inquiry in musicology and sound studies Rethinking Music through Science and Technology Studies draws together a wide range of both leading and emerging scholars to offer a critical survey of STS applications to music studies considering topics ranging from classical music instrument making to the ethos of DIY in punk music The book's four sections focus on key areas of music study that are impacted by STS organology sound studies music history and epistemology Raising crucial methodological and epistemological questions about the study of music this book will be relevant to scholars studying the interactions between music culture and technology from many disciplinary perspectives

**Collaborative and Distributed Processes in Contemporary Music-Making** Richard Glover, Lauren Redhead, 2020-04-09 This volume represents the second proceedings of the Royal Musical Association's RMA Music and as Process Study Group It is not surprising that a large number of the contributors to the Music and as Process Study Group are active practitioners in the performance and composition of contemporary music The collaborations documented here represent the bringing together of disciplines joint work between practitioners who contribute their own specific areas of expertise to a composite creative activity and work that crosses disciplines in order to make a critical comment in each of them In this collection these three types of collaborative work describe an increasing amount of contemporary music practice In addition to the increasing involvement of practice in research the understanding and prevalence of practice methodologies in the form of practice research has also increased in musicology This volume reflects these concerns through contributions from authors who are all active practitioners in their respective fields of music performance composition improvisation and conducting The diversity of these contributions shows the variety of processes and practices that are currently being undertaken by proponents of the field of contemporary music These essays provide a snapshot of the current collaborative and distributed processes that are employed by today's contemporary music practitioners The chapters contained in this volume reveal the varied nature of the approaches to creativity in music making and the ways that these are distributed across its practitioners during each stage of the development of musical works
