Battistella,1996-08-22 Theories of language espoused by linguists during much of this century have assumed that there is a hierarchy to the elements of language such that certain constructions rules and features are unmarked while others are marked play for example is unmarked or neutral while played or player is marked This opposition referred to as markedness is one of the concepts which both Chomskyan generative grammar and Jakobsonian structuralism appear to share yet which each tradition has treated differently Battistella studies the historical development of the concept of markedness in the Prague School structuralism of Roman Jakobson its importation into generative linguistics and its subsequent development within Chomsky's principles and parameters framework He traces how structuralist and generative linguistics have drawn on and expanded the notion of markedness both as a means of characterizing linguistic constructs and as a theory of the innate language faculty **Langues et littératures**

Collectif,,Andrée-Marie Harmat,Lance Hewson,2001-09-18 La plupart des textes rassemblés ici ont tradigés pour le colloque international Linguistique et langue anglaise qui s'est tenu Toulouse les 7 et 8 juillet 2000 Des linguistes des traductologues et des stylisticiens ont mis en lumière la nécessité homogène de leurs outils respectifs lorsqu'ils sont appliqués ce qui constitue le dénominateur commun de leurs diverses approches la langue En effet on peut difficilement envisager de faire passer la spécificité d'un texte d'un encodage de départ donné un encodage d'arrivée choisi pour le traductologue d'y découvrir la trace de mécanismes fondamentaux pour le linguiste d'engager des marqueurs de subjectivité créant des cartes par rapport une norme plus ou moins stable pour le stylisticien sans tenir au fait des structures nonciatives et syntaxico-sémantiques d'une ou plusieurs langues naturelles Most of the papers in this volume were written for the international conference on Linguistics and the English Language which was held in Toulouse on July 7 and 8 2000 Their authors linguists translation specialists and stylisticians underscore the necessarily homogeneous character of their scientific tools when applied to what obviously constitutes the common ground of their respective approaches language Indeed one can hardly aim at translating the specific encoding of a given source text into the chosen encoding of a target text at bringing out the traces of basic language mechanisms at highlighting the markers of subjectivity generating significant deviations from more or less pre-established norms without being fully aware of the enunciative syntactic and semantic structures of one or several natural languages This is precisely what each of the contributions selected for this volume tries to achieve with its own specified methodological device
