Andrew Moore,2023-05-15 This book reconsiders the place of magic at the foundations of modernity Through careful close reading of plays spell books philosophical treatises and witch trial narratives Andrew Moore shows us that magic was ubiquitous in early modern England Rather than a decline of magic this study traces a broad cultural fascination with supernatural power In the sixteenth and seventeenth centuries poets philosophers jurists and monarchs debated the reality and the morality of magic and by extension the limits of human power In this way early modern English writing about magic was closely related to the scientific and political philosophical writing from the period which was likewise reimagining humanity s relationship to nature Moore reads Thomas Hobbes s Leviathan alongside contemporary writing by the notorious witch hunters Matthew Hopkins and John Stearne He reminds us that Francis Bacon s scientific works were addressed to King James I whose own D monologue insists on the reality of witchcraft The fantastical science fiction of Margaret Cavendish

he argues must be understood within a tradition that includes works like Christopher Marlowe's Doctor Faustus and the peculiar autobiography of criminal astrologer Simon Forman. By considering these disparate works together, Moore reveals the centrality of magic to the early modern project.

FINAL VOLUME

Natural Magic Renée Bergland, 2024-04-30 A captivating portrait of the poet and the scientist who shared an enchanted view of nature. Emily Dickinson and Charles Darwin were born at a time when the science of studying the natural world was known as natural philosophy, a pastime for poets, priests, and schoolgirls. The world began to change in the 1830s, while Darwin was a young naturalist aboard the Beagle and Dickinson was a student in Amherst, Massachusetts. Poetry and science started to grow apart, and modern thinkers challenged the old orthodoxies, offering thrilling new perspectives that suddenly felt radical and too dangerous for women. *Natural Magic* intertwines the stories of these two luminous nineteenth-century minds whose thought and writings captured the awesome possibilities of the new sciences and, at the same time, strove to preserve the magic of nature. Just as Darwin's work was informed by his roots in natural philosophy and his belief in the interconnectedness of all life, Dickinson's poetry was shaped by her education in botany, astronomy, and chemistry, and by her fascination with the enchanting possibilities of Darwinian science. Casting their two very different careers in an entirely fresh light, Renée Bergland brings to life a time when ideas about science were rapidly evolving, reshaped by poets, scientists, philosophers, and theologians alike. She paints a colorful portrait of a remarkable century that transformed how we see the natural world. Illuminating and insightful, *Natural Magic* explores how Dickinson and Darwin refused to accept the separation of art and science. Today more than ever, we need to reclaim their shared sense of ecological wonder.
