Soul Of The Universe:

The Soul of the Cosmos Pratyush Singh,2020-02-14 The soul of the cosmos is about the origin of life on earth and the real soul of the cosmos It explains the mysteries and the misunderstandings of the vast number of these religions Each follower is wholly devoted to his faith so devoted that he can take the life of another devotee of different religion Why isn t this bothering us as much as it should be We all believe that our religion is mighty big but how did so many faiths come into play What was the need to create so many religions when we all ultimately aim to reach the same destination To answer these mysteries I studied these religions and I am sure that one will be surprised to know the underlying truth beneath each of these faiths is completely unexplainable and is a feat no man can achieve To understand the possibilities of different realities posed by these devotions I came to the conclusion that these religions were established by the one great god who is the soul of the whole cosmos These religions were established by him for the sake of his children It answers the undying questions of why different religions were established why some people call it Valhalla and some say Swarg and under what circumstances these religions were gifted to the world The Globe William Henry Thorne,1889 Mind, Soul and the Cosmos in the High Middle Ages Jack P. Cunningham,Adam Foxon,Rosamund M. Gammie,2025-01-24

Books of Definition in Islamic Philosophy Kiki

Kennedy-Day,2003-09-02 Islamic Philosophy has unusual origins Originally a hybrid of Greek philosophy and early Islamic theology its technical language consisted of a number of words translated from the Greek This book studies how Islamic philosophers of the ninth century AD such as al Kindi al Farabi and Ibn Sina developed an indigenous set of terms and concepts Their Books of Definition influenced the revision of the Arabic language to incorporate these new fields of knowledge Books of Definition in Islamic Philosophy The Limits of Words uses the work of these philosophers as a basis from which a comparison with their Greek precedents is enabled The book presents a framework for incorporating an Islamic and historically contextualised philosophy into a continuum of world philosophers At the core of this framework is Ibn Sina s Kitab al hudud which the author has translated into English and situates it in its correct geopolitical framework In establishing a historical and literary context for the writing and circulation of Ibn Sina s definitions the book breaks new ground in the integration of Islamic philosophy within a general history of philosophies This fascinating and comprehensive study will be of interest to scholars and postgraduate students of Islamic Philosophy
