The Elementary School Counselor:

Counseling in the Elementary School Robert Lewis Gibson, Marianne Mitchell, Sherry K. Basile, 1993 COUNSELING IN THE ELEMENTARY SCHOOL A Comprehensive Approach presents a current comprehensive overview of the elementary school counselor's role and function. This role and function is translated into chapters which describe and illustrate the rationale and activities used to implement a successful counseling and guidance program. The Elementary School Counselor William H. Van Hoose, Mildred Peters, George Edward Leonard, 1967 Elementary School Counseling John C. Worzby, Kathleen O'Rourke, 1989 This book was written for elementary school counselors, teachers, and administrators to assist them with the development and management of new elementary school counseling programs and with the renewal and revitalization of existing programs. It may also be useful for counselor educators in preparing counselors in training for their role as future managers, leaders, and service providers in elementary school counseling programs. Part I, chapters 1-6 of this three-part book introduces the reader to a comprehensive management plan which highlights the goals of education, the philosophy of elementary school counseling programs, and the role of the elementary school counselor in the education process. A step-by-step management process which builds on the four management functions of planning, organizing, actuating, and controlling is described. Part II, chapters 7-11, carries the counseling program management process into curriculum design. It provides counselors with a learning model, curriculum design ideas pertaining to child development needs, and a number of activities that support the five dimensions of child development: physical, social, self-concept, cognitive, and career development. Part III, chapters 12-13, help counselors and counseling program committees plan for and manage the future by introducing them to the concept of futurism. Counselors are presented with 5 leadership practices and 10 behavioral commitments designed to help them create the future. NB **Elementary School Counseling** John C. Worzby, Kathleen O'Rourke, Claire Dandeneau, 2003-12-16 *Elementary School Counseling* is a resource guide for graduate-level elementary school counselors in training and for practicing elementary school counselors. Its primary function is to explain how to plan, organize, activate, and control an effective elementary school counseling program. It expands on five developmental dimensions: physical, social, self-conceptual, cognitive, and career-oriented. The book contains 89 activities, each with specific procedures for classroom use. In addition, it outlines methods for helping existing elementary school counseling programs to reach their full potential. School Counseling Rosemary Thompson, 2002 In this second edition of a practical and eminently useful resource, Rosemary Thompson discusses the new and expanded roles of today's school counselors. In the wake of recent school violence and in light of the tough decisions that students now face everyday, the role of the school counselor has changed dramatically. Today more than ever, school counselors must do more than simply offer guidance on educational and vocational choices; but must become catalysts for change. This second edition examines the ways in which recent economic, political, social, and educational trends have impacted the professional school counselor. Throughout the text

Thompson integrates her discussion of recent national reform issues and the new professional standards set forth by the American School Counselors Association Focusing throughout on the inherent benefits of and need for professional counseling in our schools this second edition is a groundbreaking resource and will be of great value to school counseling students and professionals alike
