The following studies have been conducted in the United States, Canada, and Europe. In the United States, the most extensive study was conducted by the National Institute of Environmental Health Sciences (NIEHS) in the 1970s. This study involved a large number of subjects and found that exposure to asbestos was associated with an increased risk of lung cancer. Other studies have also found a link between asbestos exposure and lung cancer, but the results have been inconsistent. In Canada, a study conducted by the Health Protection Branch of the Department of Health and Welfare found that exposure to asbestos was associated with an increased risk of lung cancer. In Europe, a study conducted by the International Agency for Research on Cancer (IARC) found that exposure to asbestos was associated with an increased risk of lung cancer. Overall, the evidence suggests that exposure to asbestos is a significant risk factor for lung cancer.

the 1990s, the number of people in the United States who are obese has increased by 50 percent. In 1990, 15 percent of the population was obese, but by 2000, 25 percent of the population was obese. In 2008, 33 percent of the population was obese. The increase in obesity is a major public health concern because obesity is a leading cause of heart disease, diabetes, and other chronic diseases. The Centers for Disease Control and Prevention (CDC) estimates that obesity costs the United States \$147 billion each year in medical costs and lost productivity. The CDC also estimates that obesity is responsible for 280,000 deaths each year in the United States. The increase in obesity is a result of many factors, including changes in diet and lifestyle. In the 1990s, there was a significant increase in the consumption of fast food and sugary drinks. At the same time, there was a decrease in physical activity. Many people were spending more time sitting at work or at home watching television. The combination of these factors led to an increase in obesity. The CDC has developed several programs to help reduce obesity, including the National Physical Activity Plan and the National Dietary Guidelines. These programs aim to encourage people to eat healthier and get more exercise. The CDC also provides resources for people who want to lose weight, such as the National Weight Management Program. The CDC estimates that if the current trends continue, by 2030, 42 percent of the population will be obese. This is a significant public health challenge that needs to be addressed.

G. Lasby, 1997 Previous Eisenhower biographers have touched on his heart condition but Clarence Lasby is the first to examine the impact of the president's health on the nation. He offers a dramatic revisionist account of the events surrounding the president's 1955 heart attack and subsequent efforts by the president and his staff to minimize its political impact. Drawing on newly opened medical records and personal papers of Eisenhower's physicians, Lasby challenges virtually everything we have believed about the president's heart attack. Most disturbingly, he has discovered that the president's personal physician, Dr. Howard Snyder, misdiagnosed the attack as a gastrointestinal problem and waited ten hours before sending Eisenhower to the hospital. Lasby also sets the record straight on how the president and his aides managed the public's understanding of events and he offers evidence that Eisenhower, Dr. Snyder, and press secretary James Hagerty withheld and recast information to serve the president's political priorities. Equally important, Lasby's book offers a touching portrait of a proud man faced with a debilitating disease. It examines Ike's private struggle to lead a full life despite his condition and analyzes his decision to seek a second term even against the advice of cardiologist Paul Dudley White. It also shows how a man who had always carefully joked after his health now became obsessed with it. **The New York Times Sports Almanac** Frank Litsky, Steve Tyno, 1965 *The New York Times Book Review*, 1994-10 Presents extended reviews of noteworthy books, short reviews, essays, and articles on topics and trends in publishing, literature, culture, and the arts.
