**Popular Beliefs That People Think Are True** Guy P. Harrison, 2012-01-03 What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality asks Neil deGrasse Tyson science popularizer and author of *Astrophysics for People in a Hurry* I don't know for sure But a good place to start would be for everyone on earth to read this book Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon How do you find a gently persuasive way of steering people away from unfounded beliefs bogus cures conspiracy theories and the like This down to earth entertaining exploration of commonly held extraordinary claims will help you set the record straight The author a veteran journalist has not only surveyed a vast body of literature but has also interviewed leading scientists explored the most haunted house in America frolicked in the inviting waters of the Bermuda Triangle and even talked to a contrite Roswell alien He is not out simply to debunk unfounded beliefs Wherever possible he presents alternative scientific

explanations which in most cases are even more fascinating than the wildest speculation For example stories about UFOs and alien abductions lack good evidence but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe The proof for Bigfoot or the Loch Ness Monster may be nonexistent but scientists are regularly discovering new species some of which are truly stranger than fiction Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world Medici - Legacy Matteo Strukul,2021-08-05 The third instalment in a prize winning series charting the rise of the House of Medici as they become Masters of Florence and progenitors of the Renaissance Fontainebleau 1536 Francis II Dauphin and heir to the French throne is dead Poisoned And the royal court believe Catherine de Medici to be the murderer Catherine s husband Henry will now be the next King of France and the Medici are known to stop at nothing in the pursuit of power But not yet queen and without an heir of her own seventeen year old Catherine cannot be sure of securing her family s legacy To ensure the conception of an heir she will need to seek help from an unexpected ally Nostradamus the reclusive astronomer and purported seer Dismissed by most as a charlatan and a heretic Catherine knows he will be her only hope in becoming a mother to the future king Amid court intrigues betrayals and humiliations Catherine waits She awaits the death of her father in law King Francis and the birth of a son to carry her name For once she is queen Catherine de Medici s power will only grow But that power comes at a heavy cost one she might ever regret Strukul has a brilliant style and a rare imagination Tim Willocks Matteo Strukul has arrived with a bang His historical saga Medici is a worldwide success Il Venerd Catalogue of the Magnificent Collection of Printed Books, the Property of the Rt.
