**Interdisciplinary and Transdisciplinary Failures** Dena Fam, Michael O'Rourke, 2020-11-01 Unlike other volumes in the current literature this book provides insight for interdisciplinary and transdisciplinary researchers and practitioners on what doesn't work Documenting detailed case studies of project failure matters not only as an illustration of experienced challenges but also as projects do not always follow step by step protocols of preconceived and theorised processes Bookended by a framing introduction by the editors and a conclusion written by Julie Thompson Klein each chapter ends with a reflexive section that synthesizes lessons learned and key take away points for the reader Drawing on a wide range of international case studies and with a strong environmental thread throughout the book reveals a range of failure scenarios for interdisciplinary and transdisciplinary projects including Projects that did not get off the ground Projects that did not have the correct personnel for specified objectives Projects that did not reach their original objectives but met other objectives Projects that failed to anticipate important differences among collaborators Illustrating causal links in real life projects this volume will be of significant relevance to scholars and practitioners looking to overcome the challenges of conducting interdisciplinary and transdisciplinary research

**US Energy Policy and the Pursuit of Failure** Peter Z. Grossman, 2013-03-18 US Energy Policy and the Pursuit of Failure is an analytic history of American energy policy For the past forty years the US government has tried to develop comprehensive

policies on energy yet these efforts have failed repeatedly These failures have not resulted from a lack of will or funds but rather from an inability to differentiate between what could be undertaken and what could actually be accomplished This book explains how and why various policy efforts have come about shows why politicians have been eager to back them and analyzes why they have inevitably failed Over the past four decades US energy policy makers have pursued not just policies that have failed but also a policy process that leads to failure American Economist ,1899 **Winning Connections?**

**Special Interests and the Sale of Failed Banks** Ms.Deniz O Igan,Thomas Lambert,Wolf Wagner,Quxian Zhang,2017-11-22

We study how lobbying affects the resolution of failed banks using a sample of FDIC auctions between 2007 and 2014 We show that bidding banks that lobby regulators have a higher probability of winning an auction In addition the FDIC incurs higher costs in such auctions amounting to 16.4 percent of the total resolution losses We also find that lobbying winners have worse operating and stock market performance than their non lobbying counterparts suggesting that lobbying results in a less efficient allocation of failed banks Our results provide new insights into the bank resolution process and the role of special interests Phonography in the office Alfred Kingston,1886 Motivating Persistence in the Face of Failure

Catherine Chi Chase,2011 Failure often presents a valuable learning opportunity however students may need motivational scaffolds to protect them from the negative psychological ramifications of failure This work explored the effectiveness of a motivation based intervention called an ego protective buffer EPB that was designed to enhance persistence after failure An ego protective buffer EPB maintains a stable sense of competence by lessening the impact of failure on one's psyche The specific instantiation of an EPB tested here was designed to elicit a combination of internal and external attributions for failure External attributions protect one's sense of competence by averting the blame for failure away from the self while internal attributions encourage students to take some responsibility for remedying the failure situation Based on this theory we embedded an EPB into the rule structure of a computer based genetics game and unleashed it on 143 seventh graders In the EPB condition students were told that winning in the game was a probabilistic outcome dependent on a combination of chance and skill on the part of the students In the Control condition students were told that winning in the game was a deterministic outcome dependent on students skill only Students played the game during two class periods Measures include pre and posttests motivational survey measures and in game behaviors The EPB did have an effect on learning but only amongst high failing students High failing EPB students learned just as much as their low failing counterparts This was not so in the Control condition where high failing students learned far less than their low failing counterparts So the high failing EPB group was behaving as if they were buffered from the effects of failure We also found evidence of a possible mechanism behind this learning effect In the high failing EPB condition students were equally likely to persist after success and failure while in the Control condition students were far more likely to persist after success exhibiting risk averse behaviors This difference was more exaggerated in a within subjects comparison contrasting the same individuals in situations of high and

low failure Finally persistence after failure was associated with learning across the full sample of subjects Regardless of condition or failure rate students who persisted more after failure also learned more This study together with the author s related body of work provides compelling evidence that an EPB is a viable intervention for encouraging persistence in the face of failure
