The Of Breathing:

The Art of Breathing as the Basis of Tone-production Leo Kofler, 1897 **Neurology of Breathing** Charles Francis Bolton, 2004 Brings together in one volume many aspects of the neurology of breathing not currently available elsewhere The emphasis is on the function and the diseases of the central and peripheral nervous systems with respect to their control of the muscles of the chest wall and especially the diaphragm often termed the vital pump *The Art of Breathing As The Basis of Tone-Production* Leo Kofler, 2023-02-22 Guide to breathing for singers and public speakers referencing the theory of breathing expiration during singing control of the breath tone production resonance chambers and more My book differs from the great majority of other works upon voice culture in still another respect The majority have been written when their authors were yet in the teens of their professional career In perusing these volumes we come across many places where the thought involuntarily crosses our minds How much better it would have been if the author had waited twenty years before writing his book I entered the musical profession young in life and have always been a very close student especially of vocal science still I did not dare to come out with one printed sentence until I was satisfied that I could say something that had been matured within myself and that had borne fruit for years in the many pupils who do credit to the principles Of my book To the friends of the first edition who may miss a great many things in this volume that were in The Old Italian School I wish to say that my intention is to publish the remainder some day in a separate book The reason that I have paid so much attention to the laws of tone production is because I know that without them voice culture is a farce and instead of leading to artistic singing vocal instruction is degraded to a system of tricks and to virtuosity in howling

Atmospheres of Breathing Lenart Škof, Petri Berndtson, 2018-04-01 Attempts to think anew about philosophical questions from the perspective of breath and breathing As a physiological or biological matter breath is mostly considered to be mechanical and thoughtless By expanding on the insights of many religions and therapeutic practices which emphasize the cultivation of breath the contributors argue that breath should be understood as fundamentally and comprehensively intertwined with human life and experience Various dimensions of the respiratory world are referred to as atmospheres that encircle and connect human existence coexistence and the world Drawing from a number of traditions of breathing including from Indian and East Asian religion and philosophy the book considers breath in relation to ontological hermeneutical phenomenological ethical and aesthetic concerns in philosophy The wide ranging topics include poetry theater environmental issues and health feminism and media studies *Atmospheres of Breathing* the first collection of its kind explores an emerging respiratory philosophy of great consequence for philosophy and other fields Its rich and diverse essays many written by the pioneers of this radically new direction show the deep historical and intercultural roots of such a philosophy ranging from treatments of forerunners like Zhuangzi and Heraclitus to contemporary theorists of breathing such as Abram and Kleinberg Levin Presented here is the vision of innovative ways in which philosophy on its own or inspired by spiritual practices can

bring breathing into the center of its concern This is a landmark book that scintillates with brilliant and original insights If taken as seriously as it deserves this book has the potential to revolutionize contemporary and future thought Edward S Casey author of *The World at a Glance* and *The World on Edge* Air the misunderstood element finds ways and means of advancing to places where no one reckons with its presence and more significantly it makes space on its own strength for strange places where there were previously none Peter Sloterdijk

Poetics of Breathing Stefanie Heine,2021-05-01 Breathing and its rhythms liminal syncopal and usually inconspicuous have become a core poetic compositional principle in modern literature Examining moments when breath's punctuations cessations inhalations or exhalations operate at the limits of meaningful speech Stefanie Heine explores how literary texts reflect their own mediality production and reception in alluding to and incorporating pneumatic rhythms respiratory sound and silent pauses Through close readings of works by a series of pairs Jack Kerouac and Allen Ginsberg Robert Musil and Virginia Woolf Samuel Beckett and Sylvia Plath and Paul Celan and Herta and Paul Amirson Poetics of Breathing suggests that each offers a different conception of literary or poetic breath as a precondition of writing Presenting a challenge to historical and contemporary discourses that tie breath to the transcendent and the natural Heine traces a decoupling of breath from its traditional association with life and asks what literature might lie beyond
