The Of Beer:

The Economics of Beer Johan F. M. Swinnen, 2011-10-27 Beer has been consumed across the globe for centuries and was the drink of choice in many ancient societies Today it is the most important alcoholic drink worldwide in terms of volume and value The largest brewing companies have developed into global multinationals and the beer market has enjoyed strong growth in emerging economies but there has been a substantial decline of beer consumption in traditional markets and a shift to new products There is close interaction between governments and markets in the beer industry For centuries taxes on beer or its raw materials have been a major source of tax revenue and governments have regulated the beer industry for reasons related to quality health and competition This book is the first economic analysis of the beer market and brewing industry The introduction provides an economic history of beer from monasteries in the early Middle Ages to the recent microbrewery movement whilst other chapters consider whether people drink more beer during recessions the effect of television on local breweries and what makes a country a beer drinking nation It comprises a comprehensive and unique set of economic research and analysis on the economics of beer and brewing and covers economic history and development supply and demand trade and investment geography and scale economies technology and innovation health and nutrition quantity and quality industrial organization and competition taxation and regulation and regional beer market developments

A History of Beer and Brewing Ian Spencer Hornsey, 2003 A History of Beer and Brewing provides a comprehensive account of the history of beer Research carried out during the last quarter of the 20th century has permitted us to re think the way in which some ancient civilizations went about their beer production There have also been some highly innovative technical developments many of which have led to the sophistication and efficiency of 21st century brewing methodology A History of Beer and Brewing covers a time span of around eight thousand years and in doing so Stimulates the reader to consider how and why the first fermented beverages might have originated Establishes some of the parameters that encompass the diverse range of alcoholic beverages assigned the generic name beer Considers the possible means of dissemination of early brewing technologies from their Near Eastern origins The book is aimed at a wide readership particularly beer enthusiasts However the use of original quotations and references associated with them should enable the serious scholar to delve into this subject in even greater depth

The Curiosities of Ale & Beer: An Entertaining History John Bickerdyke, That the history and curiosities of Ale and Beer should fill a bulky volume may be a subject for

surprise to the unthinking reader and that surprise will probably be intensified on his learning that great difficulty has been experienced in keeping this book within reasonable limits and at the same time doing any thing like justice to the subject Since the dawn of our history Barley wine has been the natural drink for an Englishman and has had no unimportant influence on English life and manners It is therefore somewhat curious that up to the present among the thousands of books published annually no comprehensive work on the antiquities of ale and beer has found place Some years ago this strange neglect of so excellent a theme was observed by the late John Greville Fennell best known as a contributor to *The Field* and who like John of the Dale was a lover of ale With him probably originated the idea of filling this void in our literature As occasion offered he made extracts from works bearing on the subject and in time amassed a considerable amount of material which was however devoid of arrangement Old age overtaking him before he was able to commence writing his proposed book he asked me to undertake that which from failing health he was unable to accomplish To this I assented and at the end of some months had prepared a complete scheme of the book with the materials for each chapter carefully grouped That arrangement for which I am responsible has with a few slight modifications been carefully adhered to The work did not then proceed further as to carry out my scheme a large amount of additional matter from sources not then available was required A few months later my friend was taken seriously ill and finding his end approaching directed that on his decease all papers connected with the book should be placed at my disposal His death seems to render a statement of our respective shares in the book desirable When able to resume work on the book with the object of hastening its publication I obtained the assistance of my friend Mr J M D By the collection of fresh matter in amplification of that already arranged and the addition of several new features we have considerably increased the scope of the work and it is to be hoped added to its attractiveness To my friend's researches in the City of London and other Records is due the bringing to light of many curious facts so far as I am aware never before noticed He has also rendered me great assistance in those portions of the book in which the antiquities of the subject are specially treated The illustrations have been in most part taken from rare old works As any smoothing away of defects in such relics of the past would be deemed by many an offence against the antiquarian code of morality they have been reproduced in exact fac simile and will no doubt appeal to those interested in the art of the early engraver and amuse many with their quaintness As aptly terminating the chapter devoted to an account of the medicinal qualities of ale and beer I have ventured to enter upon a short consideration of the leading teetotal arguments In extending their denunciations to ale and beer drinkers the total abstinents are in my opinion working a very grievous injury on the labouring classes who for centuries have found the greatest benefit from the use of malt liquors Barley broth should be looked upon as the temperance drink of the people or in other words the drink of the temperate
