The Of Colour

Clifford Lane

The Of Colour:

Principles of Colour and Appearance Measurement Asim Kumar Roy Choudhury,2014-02-19 Colour and appearance perceptions are very complex psychological phenomena Written by one of the foremost authorities in the field Principles of Colour and Appearance Measurement is a major two volume work addressing the key topics required to understand the issues and manage colour effectively The book addresses how objects appear to viewers how viewers perceive colour and the major types of instrumentation used to measure colour Chapters detail the characteristics of light sources and object colour and appearance attributes They encompass the complexities of human visual perception including the various causes and types of colour blindness and other unusual visual phenomena The book also covers colour measurement instruments and methods as well as fluorescence and whiteness Principles of Colour Appearance and Measurement is a comprehensive resource for designers colour technologists colour quality inspectors product developers and anyone who uses colour in their work Addresses the key topics required to understand the issues of colour measure and management Examines how viewers perceive colour and how objects appear to them Reviews the major types of instrumentation used to measure colour

Theories of Colour from Democritus to Descartes Véronique Decaix,Katerina Ierodiakonou,2024-10-25 Theories of Colour from Democritus to Descartes investigates issues of the ontological status and perception of colours such as What is the nature of colours Do they exist independently of the subjects who perceive them And if so how are they generated and how do they differ from one another These are some of the questions raised by philosophers but what has been lacking is an account of the various theories about colours through different periods of the history of philosophy Exploring philosophical debates on the nature and perception of colours from a historical perspective this book presents how different theories from Antiquity through the Middle Ages to the early modern era explain the nature of colours their generation and the way they are perceived Twelve eminent historians of philosophy analyse the theories of colours prevailing at critical points in the history of Western philosophy from its beginnings with Democritus to Descartes and the early modern period This book will appeal to students and scholars working on the history of philosophy ancient medieval Arabic and Latin and early modern as well as those interested in contemporary philosophy philosophy of the mind philosophy of perception phenomenology metaphysics and neurosciences A broader audience may also include researchers in psychology cultural history and the history of art
