*The Symbols of the Church*

Maurice Dilasser,1999 Science has its own language the arts have another Religion uses especially the language of the arts for it uses signs and symbols like bridges from the visible to the invisible from the depths to the heights from the earthly world to the heavenly one from humanity to God The symbol is not an object of worship but invites to worship It leads to the encounter with the divine Its language takes an object or an action and from it evokes something other which is often inexpressible by virtue of some correspondence natural association or convention From publisher description
