Symposia Mathematica Volume 1:

Symposia Mathematica, 1977 *Symposia Mathematica*, 1969 *Differential Geometry, Part 1* Shiing-Shen Chern, 1975 **Literature 1970, Part 1** Siegfried Böhme, Walter Fricke, Ulrich Güntzel-Lingner, Frieda Henn, Dietlinde Krahn, Gert Zech, 2013-04-18 *Astronomy and Astrophysics Abstracts* which appears in semi annual volumes is devoted to the recording summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970. *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 3 contains literature published in 1970 and received before August 15, 1970; some older literature which was received late and which is not recorded in earlier volumes is also included.

Meeting under the Integral Sign?: The Oslo Congress of Mathematicians on the Eve of the Second World War Christopher D.

Hollings, Reinhard Siegmund-Schultze, 2020-04-08 This book examines the historically unique conditions under which the International Congress of Mathematicians took place in Oslo in 1936. This Congress was the only one on this level to be held during the period of the Nazi regime in Germany 1933-1945 and after the wave of emigrations from it. Relying heavily on unpublished archival sources the authors consider the different goals of the various participants in the Congress most notably those of the Norwegian organizers and the Nazi led German delegation. They also investigate the reasons for the absence of the proposed Soviet and Italian delegations. In addition aiming to shed light onto the mathematical dimension of the Congress the authors provide overviews of the nineteen plenary presentations as well as their planning and development. Biographical information about each of the plenary speakers rounds off the picture. The Oslo Congress the first at which Fields Medals were awarded is used as a lens through which the reader of this book can view the state of the art of mathematics in the mid 1930s.
