## The syntax of Basque allocutive clitics

A key piece of evidence in favor of recent proposals that speech act roles are encoded in the syntax comes from languages with “allocutivity”—agreement with non-thematic addressees. This paper analyzes the syntax of allocutive morphemes in the best studied allocutive language, Basque. It is shown that properties of these morphemes, including morpheme order and the way allocutive morphemes condition exponence of neighboring heads, can be modeled using standard assumptions about cliticization, head-adjunction and case in Basque. The analysis lends support to a central idea in recent literature on the syntax of speech act roles, namely that addressees are encoded by a nominal element introduced in the left periphery. This paper proposes that, in Basque, this nominal element is overt, with a distribution that obeys principles similar to those for thematic addressees.

**Keywords:** allocutivity; clitics; addressee; case; ergative displacement; performative hypothesis; speech act

## 1 Introduction

Following Speas & Tenny (2003) and Sigurðsson (2004), much recent generative work has taken new interest Ross’ (1970) performative hypothesis—in its essence, the proposal that speech act roles corresponding to speaker and/or addressee are encoded in the syntax. In its updated form, this approach holds that syntactic objects corresponding to speaker and addressee speech act roles are introduced in designated left peripheral positions, as schematized in (1) (Hill 2007; Baker 2008; Zanuttini 2008; Miyagawa 2012; Haegeman & Hill 2013; Hill 2013; Zu 2013; Slocum 2016; Miyagawa 2017; Zu 2017; Portner et al. to appear).

(1) *The neo-performative hypothesis*  
[Speaker ... [Addressee ... [CP [TP ]]]]

An expectation raised by (1) is that parts of the postulated Speaker and Addressee-related projections will be phonetically realized in some languages. One phenomenon frequently cited as evidence to this effect are languages with agreement with non-thematic addressees—“allocutive agreement” (Miyagawa 2012; 2013). We illustrate this phenomenon in (2), from Basque, where the *-k* and *-n* morphemes on the right edge of the auxiliary agree with familiar masculine and feminine addressees, respectively, when these are not arguments of the verb.

**The Syntax of Ditransitives** Elena Anagnostopoulou,2003 The book investigates the nature and properties of indirect objects and develops a typology of double object constructions on the basis of an examination of a variety of data within and across languages It argues for a four class division of double object constructions depending on a a type of case on the goal argument and b whether the goal is introduced by a zero applicative head or is an argument of the main verb The central questions addressed revolve around locality case and the structural representation of double object constructions

## **Ditransitive structures : the English preposition TO and the Romanian preposition LA Tania**

MORARU-ZAMFIR,2023-01-01 This book examines the syntactic properties of the English preposition to and the Romanian preposition la at to within ditransitive structures Being a study of comparative syntax from a generative perspective it aims at bringing into discussion the properties of these two functional prepositions in both English and Romanian The comparative approach shows that the English to is a functional preposition fully predictable from the structure of the verb which can be deleted To is a case marker and the dative arguments introduced by this preposition are DPs By way of contrast Romanian la has shifted from a case marker to a Person marker La has a double status as follows it has a functional status only when the Dat argument analysed as DP can be doubled by the clitic where la is a Person marker In the absence of the clitic la phrases are interpreted as PPs and la will be attributed a lexical status Thus unlike the functional to la is both a a functional dative marker and b a core lexical preposition of the location and movement frames where la assigns accusative case to its object

**Approaches to Language: Data, Theory, and Explanation** Ángel J. Gallego,Aritz Irurtzun,2020-12-24 The study of language has changed substantially in the last decades In particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork This move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact Chomsky 2005 This has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts At the same time it has also led to subfield isolation and methodological a priori with some researchers even claiming that theoretical linguistics has little to offer to cognitive science see for instance Edelman Phillips den Dikken Bernstein Tortora Sprouse Sch tze Phillips 2013

**Clitics in Greek** Marios Mavrogiorgos,2010-08-18 This monograph investigates the morpho syntactic and other properties of clitic pronouns in Greek and offers a grammar of proclisis and enclisis in light of Chomsky s 1995 2001a 2005 Minimalist Program It explores the nature of clitics as syntactic topicalizers which are probed by structurally higher verbal heads to which they move and into which they incorporate morpho syntactically A theory is advanced according to which cliticization derives from syntactic agreement between the phi features

of a clitic pronoun and a phase head v in the case of proclisis and CM in the case of enclisis Incorporation of the clitic into its host is argued to depend on two factors i e the fact that the clitic only contains a subset of the features of its host and the fact that the edge of the host is accessible Also the syntax of strong pronouns and their relation to clitics of negated imperatives of surrogate imperatives and of free clitic ordering in Greek enclisis are also discussed This monograph would appeal to syntacticians and morphologists as well as to those interested in Greek and more generally in clitic syntax *Critic and Affix Combinations* Lorie Heggie,Fernando Ordóñez,2005-01-01 In this volume the relationship between clitics and affixes and their combinatorial properties has led to a serious discussion of the interface between syntax morphology semantics and phonology that draws on a variety of theoretical perspectives e g HPSG Optimality Theory Minimalism Clitic affix phenomena provide a rich range of data not only for the identification of an affix vs clitic but also for the best way to explain ordering constraints some of which are contradictory A range of languages are considered including Romance and Slavic languages as well as Turkish Greek Icelandic Korean and Passamaquoddy Moreover several articles consider dialectal microparameeterization notably in Spanish French and Occitan This volume thus reflects current debate on issues such as clitic ordering constraints the relationship of clitics to inalienable possession and the left periphery and templatic approaches to affixes vs clitics while examining a broad range of languages *Critic Doubling in the Balkan Languages* Dalina Kallulli,Liliane Tasmowski,2008 This volume is a collection of articles on clitic doubling a phenomenon that has preoccupied generative linguists since the 1980s when its theoretical importance was noted Clitic doubling is prevalent in the Balkan languages However generative studies initially dealt with its properties in Romance languages with the Balkan patterns coming increasingly into focus Since the mid nineties these patterns presented a variety of challenges to the generalisations reached on the basis of Romance while also raising new research questions The volume deals among other things with the following aspects of the phenomenon its extension within and outside the Balkan Sprachbund and the observed variation its realizational possibilities and the constraints on the status of the doubled DP direct or indirect object pronominal or non pronominal its semantics definite specific presupposed neither and pragmatics topic or not D linked or not its temporal and locational genesis the relationship between the clitic and its associate *Research on Second Language Processing and Processing Instruction* Michael J.
