Lamson-Scribner,1892      *Evidence Based Equine Nutrition* Teresa Hollands,Lizzie Drury,2023-09-30 This book uniquely provides both the scientific basis of equine nutrition and the translation of that science into practical day to day feeding advice It summarises the latest research to provide readers with the evidence base needed to both confidently advise those who want to understand the science behind equine nutrition and apply that evidence into practical advice for anyone who just wants to know how to feed horses Both veterinary and animal science courses struggle to provide adequate nutrition training within their syllabuses Much of the general information available is poorly explained and not evidence based This book fills that gap with the author team relaying over 50 cumulative years experience teaching equine nutrition to both practising clinicians and students A recommended resource to support the teaching of veterinary nutrition this book should also be found on the bookshelf of all veterinarians animal scientists trainers nutritionists and nutritional advisors

Legislative Council*,1883      *East Africa's grasses and fodders: Their ecology and husbandry* G. Boonman,2013-03-09 The series Tasks for Vegetation Science is devoted to a variety of research aspects in vegetation science pure as well as applied Of the applied problems one of the most pressing is to achieve better knowledge and improvement of the pasture vegetation in tropical and subtropical regions As series editor I was impressed by the sheer volume of useful scientific information concerning pasture plants from East Africa collected during many years by Dr Boonman and compiled in one manuscript Dr Boonman first came to East Africa in 1963 on an overland journey along the river Nile which took him from Alexandria in Egypt to Lake Victoria in Uganda and Kenya and back again After a brief spell as a cotton agronomist in the Sudan Gezira he joined the grassland research team at Kitale Kenya in 1966 Improvement of seed yield of tropical grasses was his principal interest which finally led him into the field of breeding grasses Well known varieties from his work include Boma Elmaba Rhodesgrass as well as Clone 13 Elephantgrass In 1979 he was recalled to The Netherlands to head a cooperative seed company involved in the breeding of grasses and cereals The author has focused this study on one region Eastern Africa Global application of theories runs into conflicts too easily with local types of farming if not with bare economics Very few books can be found that describe existing practices and seek local answers by digging deep in the stacks of old local reports
