Swimming, by A. Sinclair and W. Henry Archibald Sinclair, 1894 **Biology of Sharks and Their Relatives** Jeffrey C. Carrier, John A. Musick, Michael R. Heithaus, 2004-03-29 Winner of Choice Magazines Outstanding Academic Title award January 2005 Sharks and their relatives are the subjects of tremendous interest The public's fascination is influenced by their roles in movies and popular literature while the media races to cover stories of predators endangering helpless humans The alarming threat to shark population **Sharks** Teresa Farino, 1990 *Physiology of Elasmobranch Fishes* Trevor J. Shuttleworth, 2012-12-06 There can be little doubt that to use the parlance of the advertising world the elasmobranch fishes have a high profile image in today's world To most members of the general public they are seen as terrors of the deep perfect aquatic predators and the stars or more accurately the villains of major Hollywood movie films and innumerable television nature programmes Such an image belies the fact that the vast majority of elasmobranch species feed on invertebrates and that for man the threat from shark attack is infinitesimal compared with even being struck by lightning Similarly there can be few biologists who have not carried out the classic vertebrate dissection of the dogfish at some stage early in the formative years of their scientific education Yet elasmobranch species make up only a small proportion perhaps little more than 1 % of all vertebrates and there are probably nearly 50 times as many teleost species as there are

elasmobranchs It is also curious that as subjects for modern research elasmobranchs seem to be chosen sometimes for their unique physiological characteristics and at other times because they represent excellent model systems for the study of some general process Equally it is for both these seemingly contradictory reasons that this book was proposed *Sharks* Erik Daniel Stoops, Sherrie Stoops, 1995 This book tells everything that is most interesting about sharks in a question and answer format the best way to explore these fascinating creatures without actually meeting one face to face **Routledge's Every Boy's Annual** ,1872 *Sharks* M. Oakley, Unauthored, 1996-06 Describes the characteristics and behavior of sharks and looks at a variety of shark species *The Mechanics and Physiology of Animal Swimming* L. Maddock, Q. Bone, J. M. V. Rayner, Marine Biological Association of the United Kingdom, Society for Experimental Biology (Great Britain), 1994-09-15 This volume brings together current research on a wide range of swimming organisms with an emphasis on the biomechanics physiology and hydrodynamics of swimming in or on water Several chapters deal with different aspects of fish swimming from the use of different gaits to the operation of the locomotor muscles All chapters are by recognised authorities in their different fields and all are accessible to biologists interested in aquatic locomotion **Sharks!** Downs Matthews, 1996 Describes the characteristics and behavior of sharks looks at a variety of species and discusses the relations between humans and sharks *Sharks* Jen Green, 2003 Presents information on the physical characteristics habitats life cycle and behavior of different species of sharks Includes a multimedia disk containing activities puzzles and games *Shark Attack* Tim Wallett, 1978 *Shark Attack* Mark Shulman, 2007-07 Photos and information about the top ten dangerous attack sharks **Bullion** ,1881
