Neuroendocrinology David A. Lovejoy,2005-08-26 There has been an explosion of interest in the field of neuroendocrinology over the last twenty years with the discovery of neurohormones regulating virtually everything from growth and development to sexual and aggressive behavior This book provides a much needed introduction to neuroendocrinology from a zoological and evolutionary perspective It covers the evolution development and description of the neuroendocrine system throughout the animal kingdom Specific topics covered include The Evolution of early neuroendocrine systems in primitive animals Structural characterisation molecular biology and biochemistry of neuroendocrine agents A profiles section on unusual aspects of neuroendocrine physiology written by leaders in the field A unique section on the actions of environmental chemicals effect neuroendocrine systems in various species Aquagenesis Richard Ellis,2001 Ellis s detailed drawings bring animals to life that have not been seen for 400 million years some that rival science fiction monsters for sheer weirdness Early crocodiles and turtles were three times larger than they are today and there was once a manatee that was 30 feet long and had no bones below the elbow There were the trilobites jointed animals with complex eyes that dominated the seas for 200 million years and then completely disappeared sharks with teeth on their backs and others 50 feet long with teeth the size of your hand Fifty million years ago some land dwelling mammals reentered the water and began the process of modification that turned them into whales It was the most astonishing transformation in mammalian history In Aquagenesis you will track these changes and meet the paleontologists who have found the links

between the terrestrial mammals and the first semiaquatic whales creatures that probably looked like hyenas huge shrews or fat otters Today the only animal on earth that regularly walk in an upright two legged stance are penguins and people It is possible that our size shape stride intelligence and hair or lack thereof can also be explained by the provocative theory of the aquatic ape BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Dialectical Social Science in the Age of Complexity* Ian Trevor King,2001 This study places dialectical thinking theory and method on a solid scientific footing with respect to the contemporary sciences of holistic relationism and offers a competing even superior philosophy of social science to the mainstream version of positivistic behaviourism It also indicates ways in which a dialectical holistic relational social science will help to shape a more democratic humane style of politics and public policy It subjects mainstream social science to wholesale reorientation and in doing so offers a valid prescription for a post positivistic post behaviourist social science that is scientifically grounded *Thomas Sebeok and the Signs of Life* Susan
