## **Symbolic Interaction And Ethnographic Research:**

*Symbolic Interaction and Ethnographic Research* Robert Prus, 1995-11-30 At the heart of the sociological enterprise is the idea that human behavior is the product of community life that people's behaviors cannot be reduced to individual properties. A major task facing sociologists and social scientists more generally revolves around the study of the accomplishment of intersubjectivity that is indicating how people become social entities and how they attend to one another and the products of human endeavor on a day to day basis. Taking issue with both positivist and postmodernist orientations to the social sciences the approach taken here insists that the theory and methods of the social sciences respect the actualities of human group life. The objective is to establish a greater epistemological coherence between the theory methods and research which typifies the social sciences and the actual ongoing practices and experiences of those who constitute the human community. This necessitates a radical reorientation of our images of science generally but most particularly of the scientific method as this pertains to the study of the human condition. Focusing on the doing of everyday life this volume examines a series of theoretical and methodological issues entailed in an interpretive ethnographic study of human group life. The ideas developed here deal with the historical roots assumptions variants concepts and literature characterizing an interpretive ethnographic approach to the study of human behavior and examine many of the major issues and obstacles facing those embarking on the study of human lived experience

## *Subcultural Mosaics and Intersubjective Realities* Robert

Prus, 1997-01-09 The author builds on the broader interpretive constructionist ethnographic and pragmatist traditions particularly those developed within symbolic interaction to provide an agenda to refocus, revitalize and synthesize the social or human sciences. Robert Prus offers a set of primary assumptions that centrally respect the unique and uniquely enabling features of the human condition as well as considers a reformulation of the cultural problematic. By viewing human group life as a subcultural mosaic that is more or less continuously in the making a systematic research agenda for attending to the entire realm of human involvement is developed one that opens every single arena of human endeavor to ethnographic inquiry
