**Symbols of the Capital** A. Mayo,2018-11-12 The subject of these pages as will be seen by the title page is American civilization as symbolized by the institutions of the chief State of the Republic New York Not that there is a specialty concerning these papers of Mr Mayo s or a desire on his part to give them but a local interest only that no other State of the Confederacy so fully represents in all its wondrous phases the new civilization of the Western World as does the Empire State possessed as it is of a commerce that searches the ends of the earth and superior as it is to all others in population wealth and executive power has been chosen by him as the best mirror in which we can behold the reflection of our present progress and the obstacles that hinder our more rapid advancement Had we space we should take pleasure in commenting on the bold radical reasoning contained in these pages some of which we opine would fall like molten lead into the stomachs of some of our barbarians should they by any happy chance fall in with these jottings of Mr Mayo s but a few facts must suffice In speaking of the rapid progress made in the industrial civilization of our own good State he says The same year that Fulton and

Livingston obtained the exclusive right of navigating the Hudson 1803 witnessed the gigantic idea of connecting the Hudson and the great lakes by a canal and although thirteen years elapsed before the mandate went forth in 1825 the Hudson was duly married to Like Champlain and Erie The following year 1820 was signalized by the passage of the first railroad charter in the Legislature and four years later the first railroad train came rolling from the Mohawk to the Hudson The Empire State is now veined by 2 749 miles of railroads which furnish one tenth of all our assessed valuation of real and personal estate whose employees number one fourteenth of our entire population and one thirty sixth of our voters over which 750 000 tons harden roll yearly and 40 000 people ride every day To each inhabitant of the State is due 135 miles of travel a year with only the remote risk of death to one passenger in 1 262 165 or one for every 47 164 426 miles of travel And again in speaking of our broad acres he says Of her 26 000 000 acres 13 000 000 already have yielded to cultivation and sustain a population of 3 470 059 divided into 663 124 families who in all the elements of a Christian civilization doubtless excel any equal number of people concentrated under one government The value of these lands be represents at 1 107 272 715 and their yearly product at 3 256 948 tons of hay 62 449 093 bushels of grain 17 127 338 bushels of esculent roots 4 907 556 pounds of flax 7 192 254 pounds of hops 13 663 830 bushels of apples 9 231 959 pounds of wool 2 100 000 value of poultry 90 293 077 pounds of butter 38 944 249 pounds of cheese 4 935 815 pounds of sugar 2 557 876 pounds of honey and 1 138 032 value of garden produce Then comes 106 349 977 capital of mechanical industry in New York raw material employed 178 394 329 manufactured articles 317 636 635 with 24 833 manufactories And finally we have the child of all these mighty forces the press crowded with the daily and weekly results of toil reaching forth with such hands as the steamship canal railroad machinery and telegraph and levying tribute over the whole world scattering 3 334 910 copies of its various issues perpetually over the State now a reflection of what is best and anon what is worst in our popular life and we have same faint symbols of the mighty power of mind and action that in two hundred and thirty eight years has changed 46 000 square miles of wilderness into one of our chief republican States The Merchants Magazine and Commercial Review Volume 40 1859

**European and American Counterparts** Yoshiharu Oritani,2019-07-09 This book uniquely explores the role and governance mechanism of central banks by applying new institutional economics NIE Simultaneously the book tests the analytical viability of NIE when applied to an organization that has both public and private characteristics Special attention is paid to the Bank of Japan BOJ based on the author s 30 years of work experience and participant observation there touching upon discussion of central bank independence The book argues that central bank independence cannot be defended solely by law and a mechanism to eliminate requests from politicians needs to be embedded within the governance structure The book also provides a comparative analysis between the BOJ and central banks in Europe and the USA In reviewing the global financial crisis of 2008 2009 it suggests possible measures based on behavioral economics and public choice theory These theory based analyses provide useful insights when considering matters such as whether a central bank should issue electronic money or the European system of central banks could be established in Asia
