

- sources of salts found in water (may include minerals, heavy metals, organo-metallic substances) and the use of electrical conductivity to determine the salinity of water samples

Testing for salinity

- The level of salts in water is tested using **Electrical Conductivity (EC)**
- Pure water has very low dissolved ion and therefore poor electrical conductivity.
- The salinity level of water is often referred to as **Total Dissolved Solids (TDS)** where

$$\text{TDS (mg/L)} = \text{EC (in mS/cm)} \times k_c \quad (k_c \text{ in Victoria is } 0.6)$$

- Pure water is a poor conductor of electricity. As concentration of ions in solution increases so does the conductivity.

Figure 1.1.1: A simple circuit for detecting salinity. The brighter the light indicates more the salts, the greater the conductivity of the solution.

Electrical conductivity (EC) $\mu\text{S cm}^{-1}$	Water quality
0-800	Good drinking water, suitable for irrigation and livestock
800-2500	Unpleasant to drink; use in irrigation needs to be managed
2500-10000	Not recommended for human consumption; suitable for salt-tolerant vegetation only
>10000	Not suitable for any plants or animals

A Symphony of Silence: An Enlightened Vision 2nd Edition George A. Ellis, 2015-05-01 The first edition of A Symphony of Silence An Enlightened Vision was inspired by the desire to share with humanity through multiple voices the ineffable beauty we experience in our lives when the veil of ignorance is pulled back and the wonder of our essential nature is revealed The voices emerging from these pages add vitality and validity to our shared experience of the silence of the transcendent It is not something beyond our reach but a reality that has always been with us quietly awaiting an opportunity to unfold In this second edition of A Symphony of Silence several new voices are added to the chorus of the first edition A Catholic priest tells us of using TM as part of his inspired vision of the power of love to transform the lives of abused and destitute children from the streets of South America The founding director of an orphanage and school in Uganda who likewise brings TM to children in need describes to us his compassionate resolve to eradicate suffering within his

community A poet expresses for us in verse the joy of a seeker reaching for the light A scientist and his colleagues show us the power of TM to reduce stress and alleviate PTSD in the field of law enforcement An actor director producer and entrepreneur explores with us his innovative projects for inner city students through Edutainment Women who for decades dedicated themselves to introducing the TM program to their multicultural community share with us delightful and very personal stories A pioneering social activist brings us into the conversation he had with Maharishi in 1968 at a conference in Squaw Valley California He talked candidly with Maharishi about the need to introduce TM as a tool to bring inner freedom to the inner cities helping to fulfill the quest for true civil rights The voices in A Symphony of Silence create a glimpse into the vast impact that Maharishi has on many lives throughout the world
