The Routledge Handbook of Progressive Rock, Metal, and the Literary Imagination Chris Anderton, Lori Burns, 2025-02-26

This Handbook illustrates the many ways that progressive rock and metal music forge striking engagements with literary texts and themes. The authors and their objects of analytic inquiry offer global and diverse perspectives on these genres and their literary connections from ancient times to the modern world from children's literature to epic poetry from mythology to science fiction and from esoteric fantasy to harsh political criticism. The musical treatments of these literary materials span the continents from South and North America through Europe and Asia. The collection presents critical perspectives on the enduring and complex relationships between words and music as these are expressed in progressive rock and metal. The book is aimed primarily at an academic market valuable for second through final year students on undergraduate courses devoted to both popular music and to literary studies and to postgraduate programs and researchers in a range of fields including popular music studies, musicology, creative music performance and composition, songwriting, literary studies, narrative studies, folklore studies, science fiction studies, cultural studies, liberal studies and sociology and for media and history courses that have an interest in the intersection of narratives, music and society.

A New Economic Theory of Public Support for the Arts Arnaldo Barone, 2015-12-14 Should the arts receive public support? Can the arts survive in a modern capitalist society? Can economics shed light on the nature of public support and whether there is a rationale for public intervention? This book undertakes to examine these questions as it explores the ways government and public resources are used to support the arts. This book applies a Veblenian approach to understanding economic development to investigate public support for the arts in an effort to determine whether this approach can elucidate economic rationales for public support. Divided into three parts, the first provides basic information on public support for the arts by surveying support in the United States and Australia. Part two includes a neoclassical overview of the topic while part three presents Veblen's ideas on economic development. This book will be of interest to researchers concerned with cultural and institutional economics as well as political economy.
