## **Syntax A Functionaltypological Introduction Syntax:**

**Syntax** Talmy Givón,1984 The long awaited second volume of the two volume work on syntax from a functional typological perspective Grammar is viewed as a non arbitrary language processing device to be understood in terms of the various substantive parameters relevant to language Communicative function cognitive processing socio culture and neuro biology Distortions in this complex yet highly iconic code are due to conflicting functional requirements most commonly introduced into the code through the course of diachronic change Cross linguistic variation within each functional domain is highly constrained and yields a coherent typology of the most natural ways the same communicative function can be performed The volume covers the syntax of complex clauses and is organized according to the following plan Chapter 12 Noun phrases Chapter 13 Verbal complements Chapter 14 Voice and de transitivization Chapter 15 Relative clauses Chapter 16 Contrastive focus constructions Chapter 17 Marked topic constructions Chapter 18 Non declarative speech acts Chapter 19 The grammar of interclausal coherence Chapter 20 The grammar of referential coherence as mental processing instructions Chapter 21 Markedness and iconicity in syntax

**Syntax** Talmy Givón,2001-01-01 This new edition of Syntax A functional typological introduction is at many points radically revised In the previous edition 1984 the author deliberately chose to de emphasize the more formal aspects of syntactic structure in favor of a more comprehensive treatment of the semantic and pragmatic correlates of syntactic structure With hindsight the author now finds the de emphasis of the formal properties a somewhat regrettable choice since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist To redress the balance explicit treatment is given to the core formal properties of syntactic constructions such as constituency and hierarchy phrase structure grammatical relations and relational control clause union finiteness and governed constructions At the same time the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored and the interplay between grammar cognition and neurology is outlined Also the relevant typological database is expanded now exploring in greater precision the bounds of syntactic diversity Lastly Syntax treats synchronic typological diversity more explicitly as the dynamic by product of diachronic development or grammaticalization In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development and are thus merely the apparent by products of universal constraints on grammaticalization

regrettable choice since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist To redress the balance explicit treatment is given to the core formal properties of syntactic constructions such as constituency and hierarchy phrase structure grammatical relations and relational control clause union finiteness and governed constructions At the same time the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored and the interplay between grammar cognition and neurology is outlined Also the relevant typological database is expanded now exploring in greater precision the bounds of syntactic diversity Lastly Syntax treats synchronic typological diversity more explicitly as the dynamic by product of diachronic development or grammaticalization In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development and are thus merely the apparent by products of universal constraints on grammaticalization

Bybee,John Haiman,Sandra A. Thompson,1997-01-01 In their subject matter and in their theoretical orientation all the papers in this volume reflect the powerful influence of T Givón Most of them deal with questions of morphosyntactic typology pragmatics and grammaticalization theory Many of them are directly based on extensive fieldwork

on local languages of the Americas Africa Asia and the Pacific Others are based on statistical analyses of extensive written and spoken corpora of texts *Form and Function in Language Research* Johannes Helmbrecht,2009 Language description enriches linguistic theory and linguistic theory sharpens language description Based on this assumption the volume presents theoretical and empirical studies that explore the explanatory power of functional typological linguistics Approaches to Language Typology Masayoshi Shibatani,Theodora Bynon,1999 What do all languages have in common and what gives each language its individuality Language typology which has developed in response to these fundamental questions is concerned with the construction of theoretical frameworks capable of delimiting the range of possible human languages and of capturing constraints on cross linguistic variation Language typology is a major concern of all contemporary schools of linguistics yet a coherent image of the field is difficult to form because of the diversity of theoretical orientations and practical methodologies This collection brings together for the first time original contributions from major schools of typological research from the Prague School to the Generative Grammar tradition Leading scholars offer first hand accounts of the theoretical foundations and substantive findings of their particular school of thought clarifying basic assumptions which are often not explicitly stated in the literature The collection as a whole provides both a survey of the place of individual typological schools in the historiography of the subject and a comprehensive account of the present state of language typology in an international context It gives an overview of both the underlying unity of and the differences in the methods employed in the field **Language Typology and Language Universals 2.Teilband** Martin Haspelmath,Ekkehard König,Wulf Oesterreicher,Wolfgang Raible,2008-07-14 No detailed description available for Language Typology and Language Universals 2 Teilband

*The World Atlas of Language Structures* Martin Haspelmath,Matthew S. Dryer,David Gil,Bernard Comrie,2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar such as number of vowels tone systems gender plurals tense word order and body part terminology Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages The Atlas will be especially valuable for linguistic typologists grammatical theorists historical and comparative linguists and for those studying a region such as Africa Southeast Asia North America Australia and Europe It will also interest anthropologists and geographers More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics No institution involved in language research can afford to be without it Typology and Second Language Acquisition Anna Giacalone

Ramat,2003 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics Copenhagen Working Papers in Linguistics ,1991 Syntax T.
