Syntax A Functional Typological Introduction Vol 1:

Syntax Talmy Givón, 1984-01-01 *Syntax* Talmy Givón, 2001-01-01 This new edition of Syntax A functional typological introduction is at many points radically revised. In the previous edition 1984 the author deliberately chose to de emphasize the more formal aspects of syntactic structure in favor of a more comprehensive treatment of the semantic and pragmatic correlates of syntactic structure. With hindsight the author now finds the de emphasis of the formal properties a somewhat regrettable choice since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist. To redress the balance explicit treatment is given to the core formal properties of syntactic constructions such as constituency and hierarchy phrase structure grammatical relations and relational control clause union finiteness and governed constructions. At the same time the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored and the interplay between grammar cognition and neurology is outlined. Also the relevant typological database is expanded now exploring in greater precision the bounds of syntactic diversity. Lastly Syntax treats synchronic typological diversity more explicitly as the dynamic by product of diachronic development or grammaticalization. In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other. It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development and are thus merely the apparent by products of universal constraints on grammaticalization.

Passivization and Typology Werner Abraham, Larisa Leisiö, 2006-01-01 Is the passive a unified universal phenomenon? The claim derived from this volume is that the passive if not universal has become unified according to function. Language as a means of communication needs the passive or passive like constructions and sooner or later develops them based on other voices impersonal active middle reflexive specific semantic meanings such as adversativity or tense aspect categories stative perfect preterit. Certain contributors review the passives in various languages and language groups including languages rarely discussed. Another group of contributors takes a novel theoretical approach toward passivization within a broad typological perspective. Among the languages discussed are Vedic, Irish, Mandarin Chinese, Thai, Lithuanian, Mordvin and Nganasan next to almost all European languages. Various theoretical frameworks such as Optimality Theory, modern structuralist approaches, Role and Reference Grammar, cognitive semantics, Distributed Morphology and case grammar have been applied by the different authors.

Structure and Function: Approaches to the simplex clause Christopher Butler, 2003 Volume one of a two volume set outlining and comparing three approaches to the study of language labelled structural functionalist functional grammar FG, role and reference grammar RRG and systemic functional grammar SFG. *Form and Function in Language Research* Johannes Helmbrecht, 2009 Language description enriches linguistic theory and linguistic theory sharpens language description. Based on this assumption the volume presents theoretical and empirical studies that explore the explanatory power of functional typological linguistics. Language Typology and Language
