Representation Andrea Giordano, Michele Russo, Roberta Spallone, 2023-09-01 This book collects contributions which showcase the impact of new augmented reality AR and artificial intelligence AI technologies considered jointly in the fields of cultural heritage and innovative design AR is an alternative path of analysis and communication if applied to several fields of research in particular if related to space and artifacts in it This happens because the neural network development strengthens the relationship between augmented reality and artificial intelligence creating processes close to human thought in shorter times In the last years the AR AI expansion and the future scenarios have raised a deep trans disciplinary speculation The disciplines of representation drawing surveying visual communication as a convergence place of multidisciplinary theoretical and applicative studies related to architecture city environment tangible and intangible cultural heritage are called to contribute to the international debate The book chapters deal with augmented reality and artificial intelligence analyzing their connections as research tools for knowing the environment In particular the topics focus on the intersection between real and virtual world and on the heuristic role of drawing in the enhancement and management of

cultural heritage in planning and monitoring the architecture the environment or the infrastructures Scientists involved in AR and AI research applied separately or together in the field of cultural heritage architectural design urban planning and infrastructures analysis as well as members of public and private organizations make up interdisciplinary groups that fuel the discussion focusing on the priorities and aims of the research related to the disciplines of representation
